

Level Up CSP: Security

Speaker name or subtitle text

Agenda

Day 1	
9:00 – 9:05	Welcome and Introductions
9:05 – 9:30	Microsoft Security Overview
9:30 – 10:10	Microsoft Security Value with Defender and Purview Suites
10:10 – 10:20	Break
10:20 – 11:00	Show and Inspire: Demand Generation
11:00 – 11:35	Scenario Analysis and Solution Development: Pre-Sales
11:35 – 11:45	Break
11:45 – 12:10	Pitch to Proof: Digital Demo Experiences
12:10 – 12:30	Objection Handling & Competitive Strategies
12:30 – 1:00	Post Sales Activation: Skilling, resources and next steps

Update this slide to match the planned agenda for the event and match where breaks are placed

Note: The length of individual topics should not be shortened or extended as the durations stated are necessary to properly progress through the content and event

Welcome and getting started

- Microsoft Security primer
- Microsoft Security value

Show and inspire

- Demand generation tools

Scenario analysis and solution development

- Pre-sales assets
- Security business case builder

Pitch to proof

- Microsoft demo experiences

Objection analysis and strategy

- Objection handling and compete

Continuing education

- Post sales resources
- Wrap-up and recap

Welcome and getting started

Welcome to Level Up CSP: Security

Goals:

Empower partners with the knowledge and skills to excel in customer conversations about Microsoft Security and the Defender Suite + Purview Suite. Provide them with a thorough overview of the tools and resources that Microsoft provides to partners.

At the end you'll have the skills to:

- Speak confidently about major threats (e.g., ransomware, insider threats, phishing) and Microsoft Security's practical solutions
- Demonstrate Microsoft security products in sales scenarios.
- Illustrate Microsoft Security's unique strengths versus key competitors
- Deliver partner led pre-sales activities to boost customer awareness of Microsoft Security Suites
- Employ the most appropriate Go-to-Market resources to drive Microsoft Security Suite sales

Resources to help you succeed

➤ CSP Level Up Learner Kit <https://aka.ms/csplevelup/content>

- Microsoft Security sales quick reference (includes all links shared in this course)
- Threat Protection and Data Security solution and product presentations
- License and product bundle presentations
- Templates and guides for activities

Download and check access while we are getting started!

Small business does not mean small security problems

88%

of breaches in SMBs involved ransomware more than double the rate in large organizations.¹

46%

of compromised systems with corporate logins were non-managed devices.¹

99%

of SMB breaches were financially motivated, with external actors responsible for 98% of attacks.¹

\$250k

Average cost for a Cyberattack for Small Businesses²

2. Microsoft SMB CyberSecurity Report

Organizations are overwhelmed with complexity

A disconnected collection
of fragmented tools

41 to 60
tools

Used by ~26% of
organizations surveyed by IDC

Widening
workforce gap

4.8M

Cybersecurity professionals
needed to effectively
secure organizations

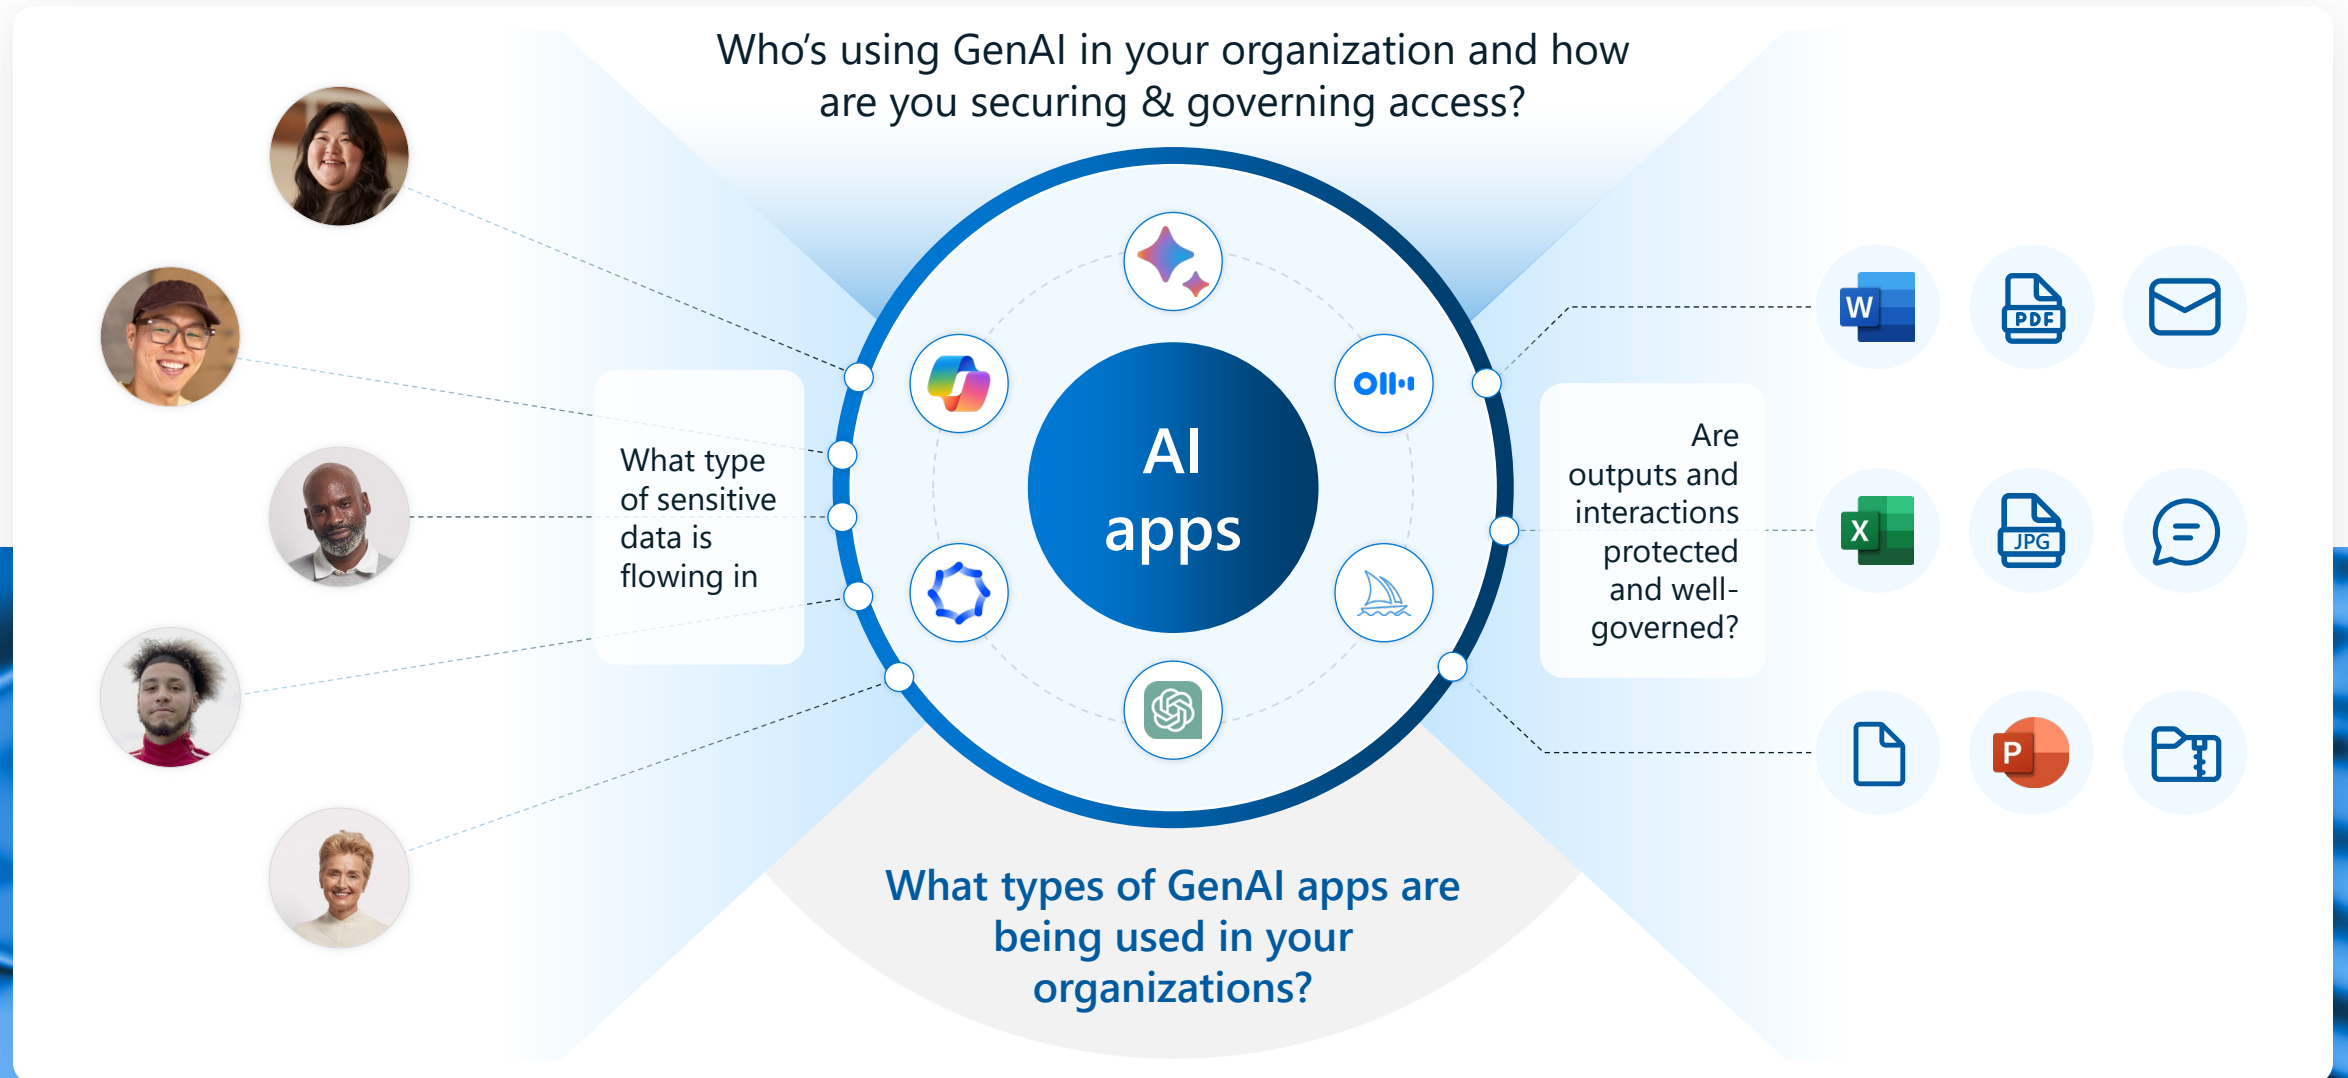

Widespread
data breaches

2.75X

Observed increase YoY in human-
operated ransomware-linked encounters
among Microsoft customers

We are living in an AI first world

AI and agents introduce new security challenges

Agent sprawl &
resource access

82%

of leaders expect to use
agents in the next 12–18
months to meet demand for
workforce capacity³

Data oversharing
& leakage

80%

of leaders cited
leakage of sensitive
data as their main concern¹

Shadow AI, new AI
threats & vulnerabilities

88%

of organizations are
concerned about indirect
prompt injection attacks²

Regulatory
Compliance

55%

of leaders lack
understanding
of how AI is and will be
regulated and are seeking
guidance¹

The security opportunity for partners continues to grow

Customers continue to invest in security...

23% YoY growth in small and medium enterprise security investments¹

42% YoY growth in small and medium enterprise managed services revenue¹

Sources

1. The Partner Opportunity for Microsoft Security, a Total Economic Impact study commissioned by Microsoft and conducted by Forrester Consulting, 2025

<https://aka.ms/ForresterMSSecurityTEI2025>

...leading to increased services revenue

\$30.40

per user per month

Small & Medium Enterprises

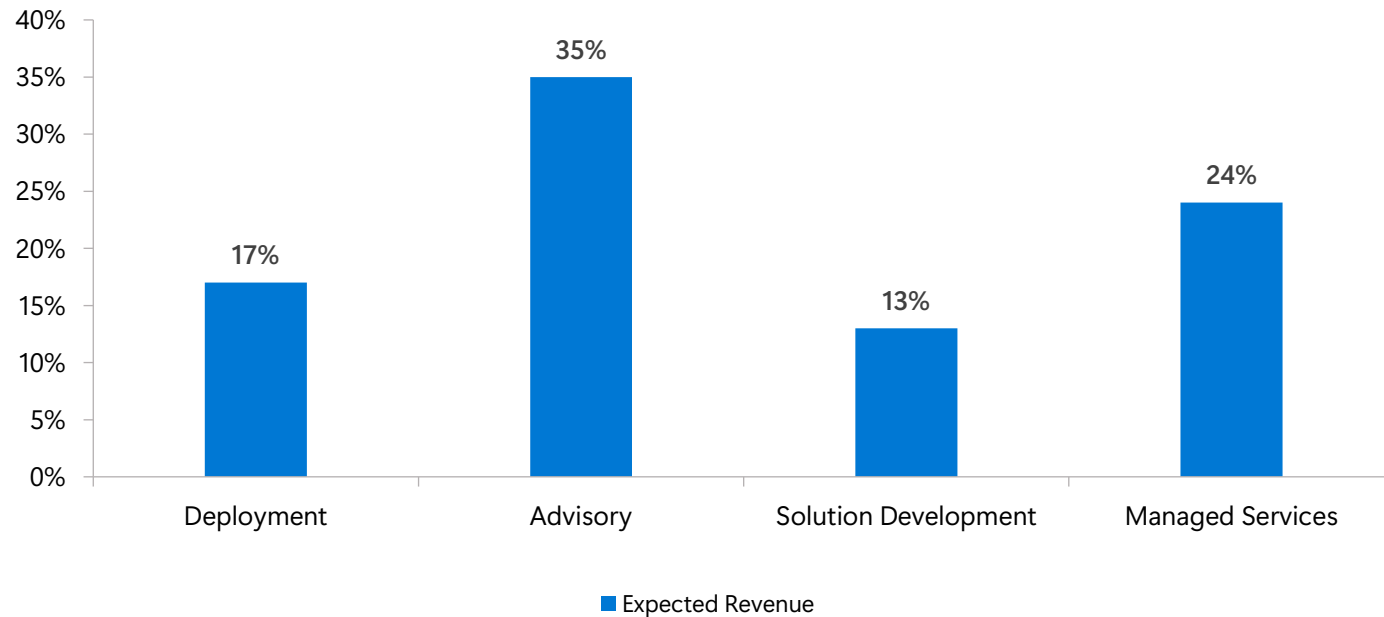

customer expected revenue opportunity

(with attach rates applied)

Protecting against advanced attacks like ransomware

Prevent, detect, and respond to ransomware at machine speed

Expected Growth by Service Area

Consulting and advisory
drives value

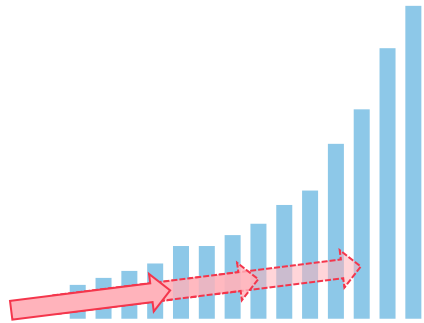

Managed services fuel
recurring growth

Developing solutions helps
land and expand

Partners that invested in their internal capabilities and Microsoft relationships reported higher revenues and profitability.

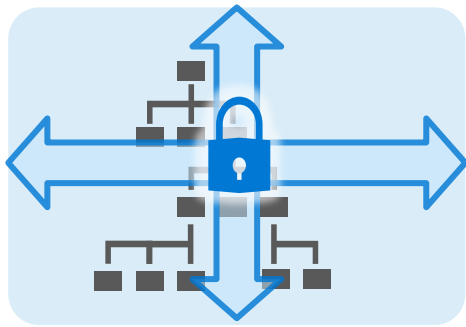

Security must be integrated everywhere

and stay on a journey of continuous improvement

Attackers prefer cheapest and easiest options

...but are often willing to go further and spend more

Security impacting decisions are made by most roles

- *Everybody* has security accountabilities and/or responsibilities
- **Decision makers** are accountable for security outcomes of their decisions
- **Security teams** must enable and support all roles across the organization (including business, engineering, and more)

Continuous improvement, learning, and prioritization are critical to manage this

Security modernization with zero trust principals

Keep assets away from attackers

Security strategy and program

Business enablement

Align security to the organization's mission, priorities, risks, and processes

Assume breach (assume compromise)

Assume attackers can and will successfully attack anything (identity, network, device, app, infrastructure, etc.) and plan accordingly

Verify explicitly

Protect assets against attacker control by explicitly validating that all trust and security decisions use all relevant available information and telemetry.

Use least privilege access

Limit access of a potentially compromised asset, typically with just-in-time and just-enough-access (JIT/JEA) and risk-based policies like adaptive access control.

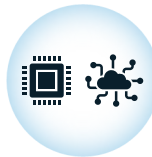

Zero trust architecture

Access and identity

Infrastructure &
development security

IoT and OT
security

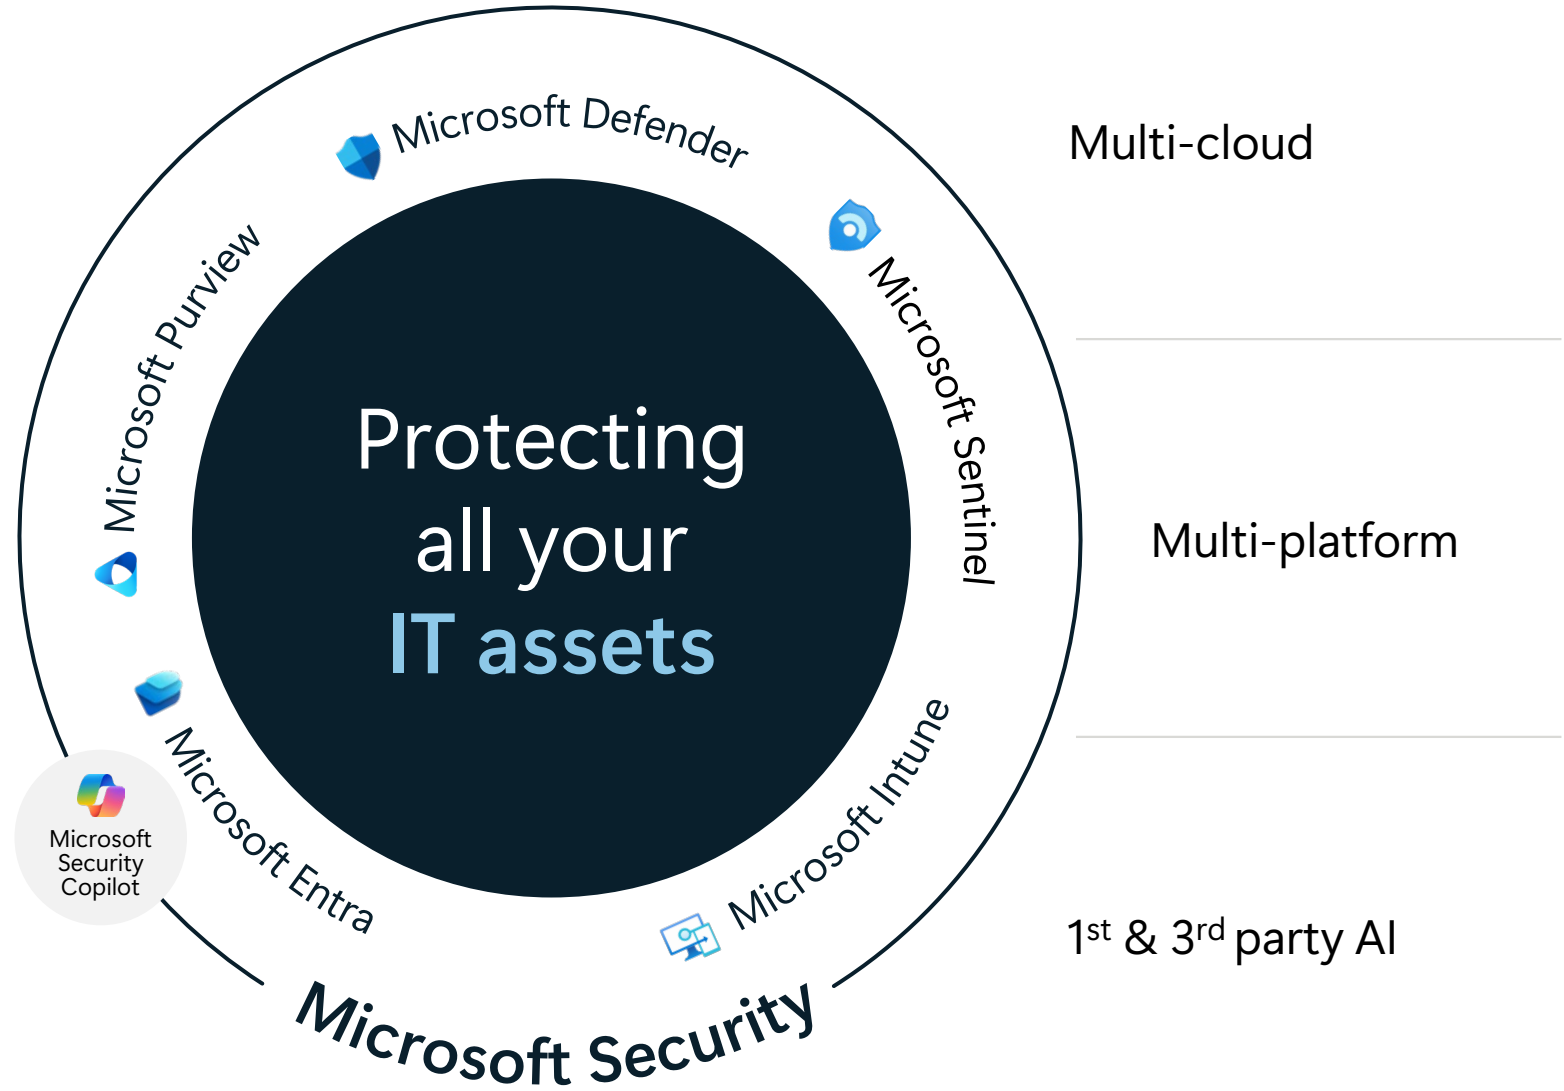

Modern Security
Operations (SecOps/SOC)

Data security

Security for your entire estate

Microsoft Security

Microsoft Entra

Ensure only the right people get access

Reduce risk of stolen credentials

Microsoft Defender

Stop threats before they cause damage

Block cyberattacks like ransomware

Microsoft Purview

Keep sensitive information under control

Stop data leaks and avoid compliance fines

Microsoft Intune

Keep company devices and apps secure

Work stays safe anywhere

Microsoft Sentinel

Spot suspicious activity across entire business

Catch threats early before they spread

Tomorrow's defense, today

Predict attacks to
enable adaptive posture

Detect emerging
threats in real-time

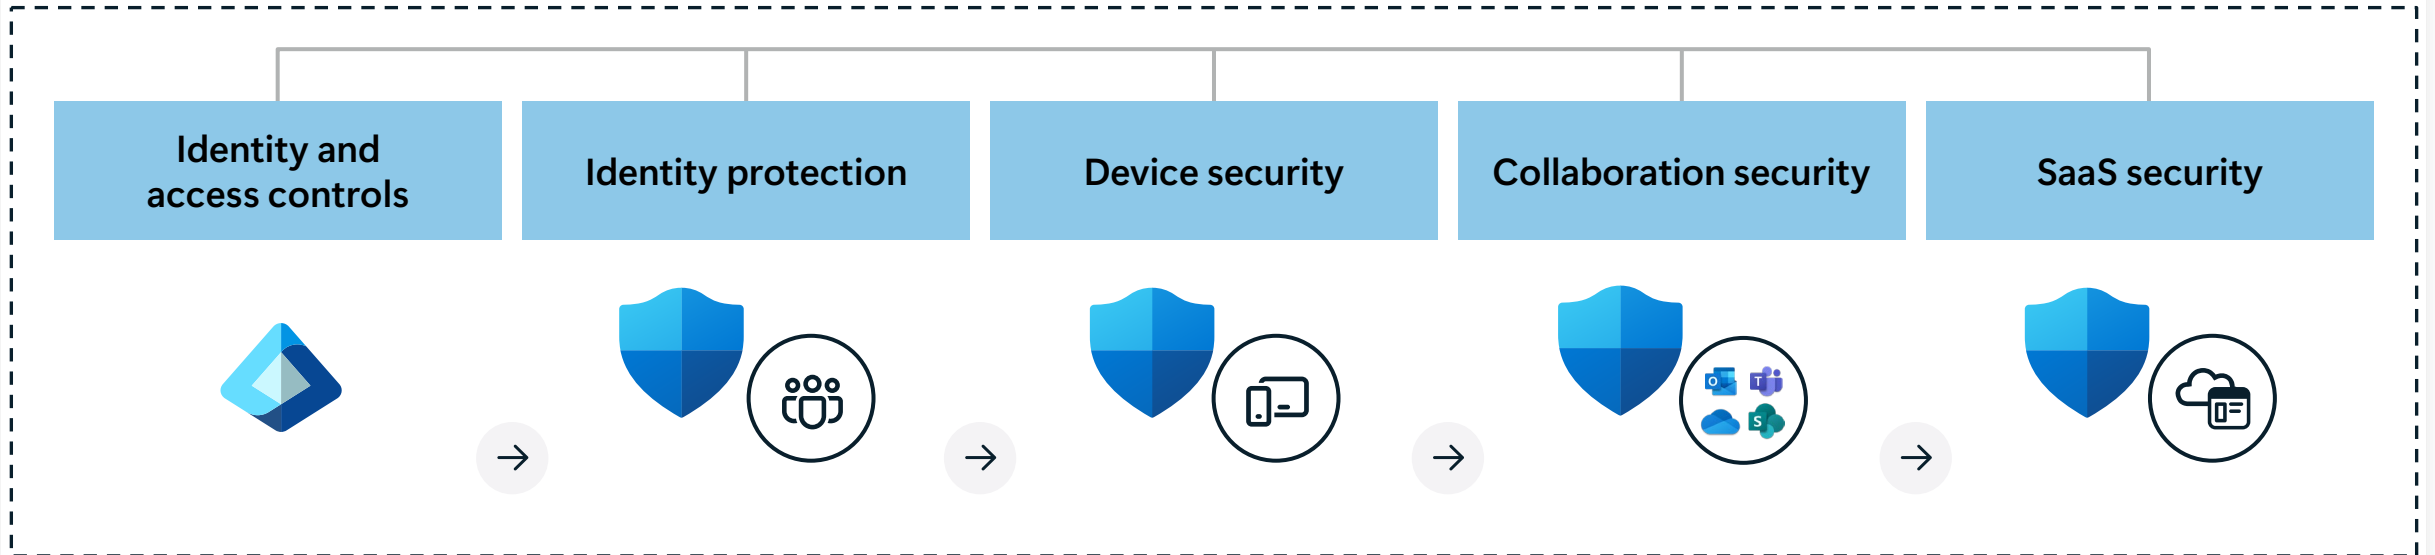

Rapidly remediate
with automated response

Continuously optimize
Security operations

AI-first end-to-end security platform

Microsoft Defender Suite

Microsoft Sentinel

350+ connectors

AI-first end-to-end security platform

Microsoft Defender Suite

Microsoft Purview

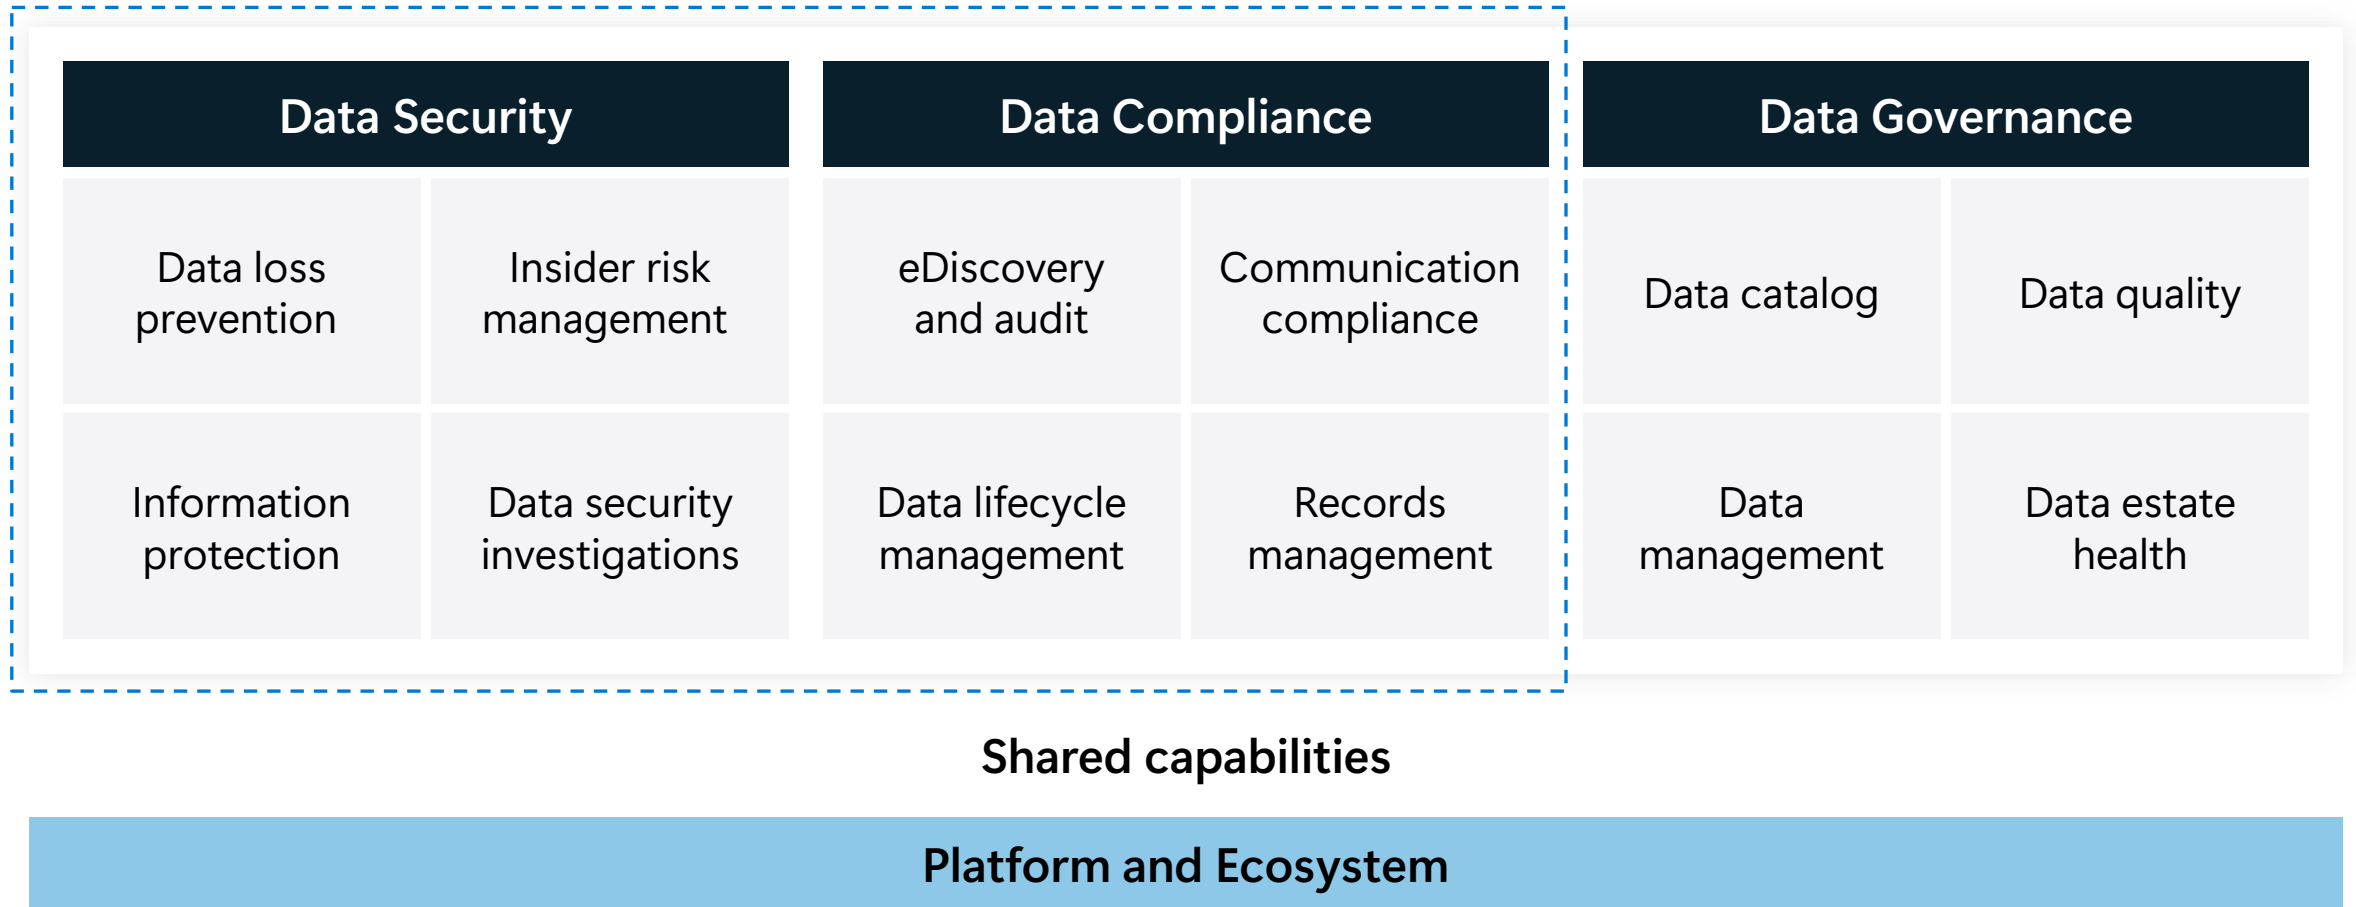

A unified approach to secure
and govern your data

Microsoft Purview

Unified data security, governance and compliance solutions for the era of AI

Microsoft Purview Suite

Unified data security, governance and compliance solutions for the era of AI

Data Security

Information Protection

Safeguard sensitive data everywhere reducing compliance risk and enabling secure collaboration across your organization.

Data Loss Prevention

Prevent accidental or malicious data leaks with intelligent policies that protect sensitive information across endpoints, apps, and cloud services

Insider Risk Management

Proactively manage internal risks with privacy-first analytics

Data Compliance

eDiscovery and audit

defensible compliance with robust eDiscovery and audit capabilities, reducing investigation time and litigation costs.

Communication Compliance

Reduce regulatory penalties and reputational harm by detecting inappropriate or risky communications across email and Teams.

Data lifecycle management

Optimize data retention and deletion with automated lifecycle policies that protect sensitive data and eliminate unnecessary exposure

Adaptive Protection

Automatically adjust security controls based on real-time risk signals, so your business stays protected without slowing down productivity

Microsoft Defender Suite

Microsoft
Defender
Suite
(\$12.00)

<u>Microsoft Defender for Office 365 Plan 2</u>	\$5.00	A cloud-based email filtering service that helps protect your organization against unknown malware and viruses by providing robust zero-day protection and includes features to safeguard your organization from harmful links in real time. In addition to Plan1, Plan 2 also offers automated investigation & response, threat trackers, and an attack simulator
<u>Microsoft Defender for Cloud Apps</u>	\$3.50	A multimode Cloud Access Security Broker (CASB). It provides rich visibility, control over data travel, and sophisticated analytics to identify and combat cyberthreats across all your cloud services.
<u>Microsoft Entra ID P2</u>	\$9.00	Microsoft's cloud-based identity and access management service, which helps employees sign in and access resources. In addition to Free and P1 features, P2 also offers Identity Protection to help provide risk-based Conditional Access to apps and critical company data and Privileged Identity Management to help discover, restrict, and monitor administrators and their access to resources and to provide just-in-time access when needed.
<u>Microsoft Defender for Identity</u>	\$5.50	A cloud-based security solution that leverages your on-premises Active Directory signals to identify, detect, and investigate advanced threats, compromised identities, and malicious insider actions directed at your organization.
<u>Microsoft Defender for Endpoint Plan 2</u>	\$5.20	A unified endpoint security platform for preventative protection, post-breach detection, automated investigation, and response. The product offers Threat and Vulnerability Management, tools to surgically reduce the attack surface, next-generation protection to block threats and malware, Endpoint detection and response to detect advanced attacks, automated investigation and remediation of threats and Managed threat-hunting service.
<u>Safe Documents¹</u>	*	Uses Microsoft Defender for Endpoint to scan documents and files that are opened in Protected View or Application Guard to automatically check Office documents (Excel, PowerPoint, Word etc.) "against known risks and threat profiles" before users open them.
<u>Application Guard for Office 365¹</u>	*	Isolates untrusted documents to protect users against malicious and potentially harmful threats. at risk. When a user encounters a malicious document, it is safely isolated.
<u>Defender for IoT – EloT²</u>	*	Includes coverage of 5 EloT devices for each M365 E5 license; additional device coverage is \$0.85 per device per month. Provides discovery of network devices, vulnerability management, and threat detection and response.

Prices = Commercial ERP /per user/per month

¹ Only provided via Microsoft 365 E5 or Microsoft Defender Suite

² Per device per month

Microsoft Defender Suite

Monthly cost

¹Price is pupm and subject to change based on subscription term, currency and region.

Value proposition

Stronger capability, built for modern threats.

Office 365 E3 + EMS E3

Or

Microsoft 365 E3

Productivity and Management suite

- Entra ID P1: **Conditional Access** based on predefined conditions like device compliance, location, and app sensitivity
- Azure Information Protection P1: **Encrypt emails** and discover, classify, and manually label sensitive data.
- Intune P1: Manage **devices and work data** on company-owned and employee devices. Remove business data from lost or stolen devices
- Defender for Endpoint P1: **Antivirus and Antimalware protection** with manual response actions

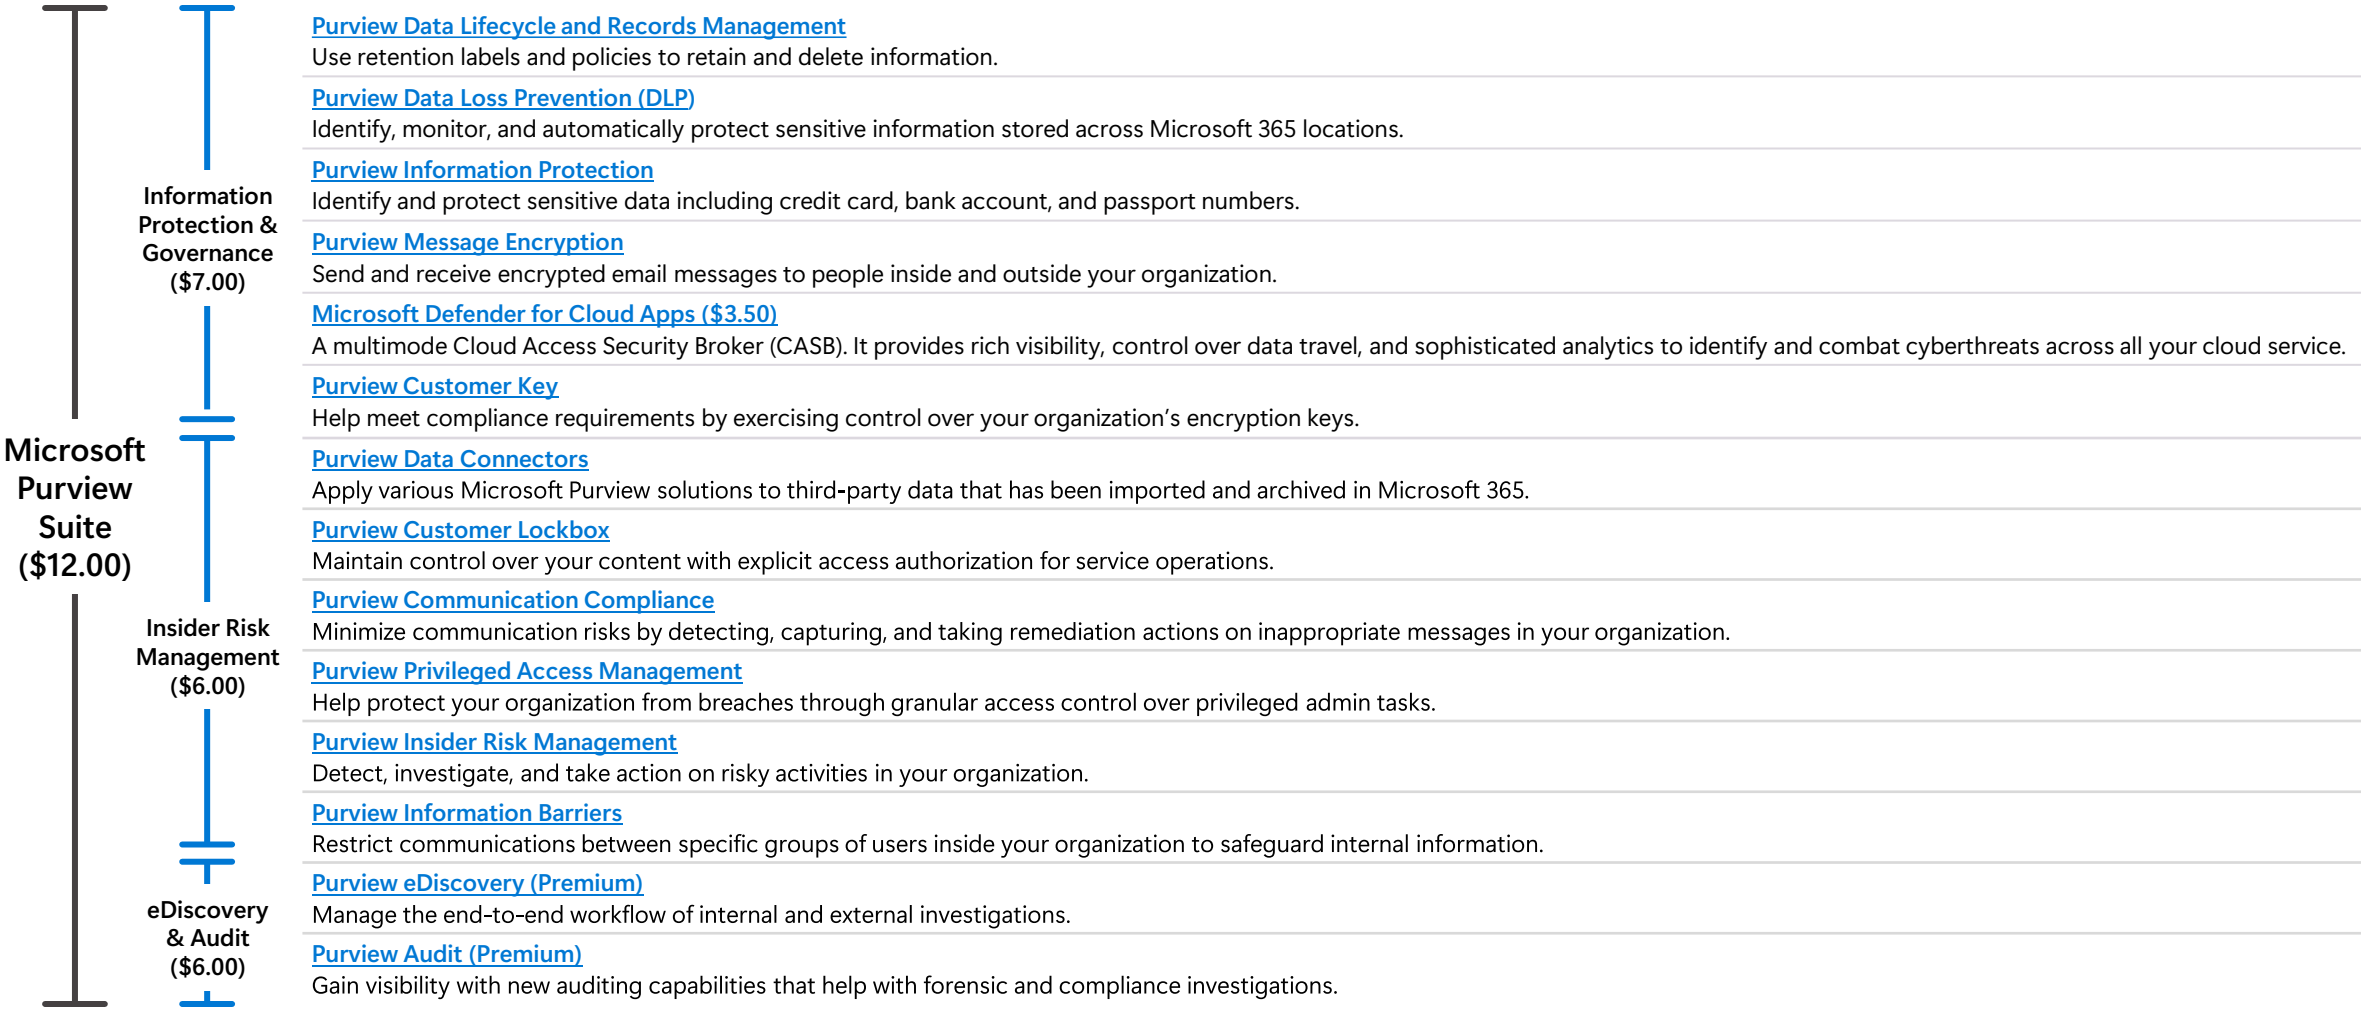

Microsoft Defender Suite

Enterprise-Grade XDR solution

- Entra ID P2: **Risk-based conditional access**, visibility into risky sign-ins and user behavior anomalies. **Identity Governance and Privileged Identity Management**
- Microsoft Defender for O365 P2: Advanced email and collaboration security with **automated investigation and response**, and **end user phishing simulation trainings**
- Microsoft Defender for Endpoints P2: **Enterprise-grade endpoint security** with endpoint detection and response, automated investigation and advanced threat hunting
- Microsoft Defender for Cloud Apps: **Cloud Access Security Broker (CASB) solution to automatically block apps** based on risk level, unusual user activity, or data-sharing behavior to protect against sophisticated SaaS-based attacks.

Microsoft Purview Suite

Prices = Commercial ERP /per user/per month
Microsoft Purview Suite|Microsoft Security

Microsoft Purview Suite

Effective data protection that removes silos
and takes action to ensure data security

Intelligent tooling supports more efficient
data and regulatory compliance

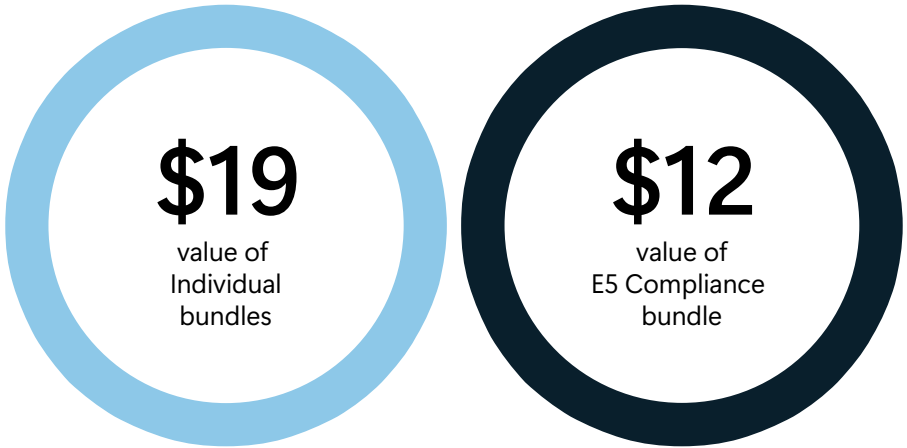

Purpose-built innovation helps safeguard
Microsoft 365 Copilot data

Microsoft Purview

Standalone bundles

Information Protection + Governance	\$7
Data Loss Prevention Information Protection Data Lifecycle Management ...and more	
Insider Risk Mgmt.	\$6
Insider Risk Management Communication Compliance Privileged Access Management ...and more	
eDiscovery + Audit	\$6
eDiscovery (Premium) Audit (Premium)	
Add on	
Compliance Manager	\$8,500 per template

Per user, per month

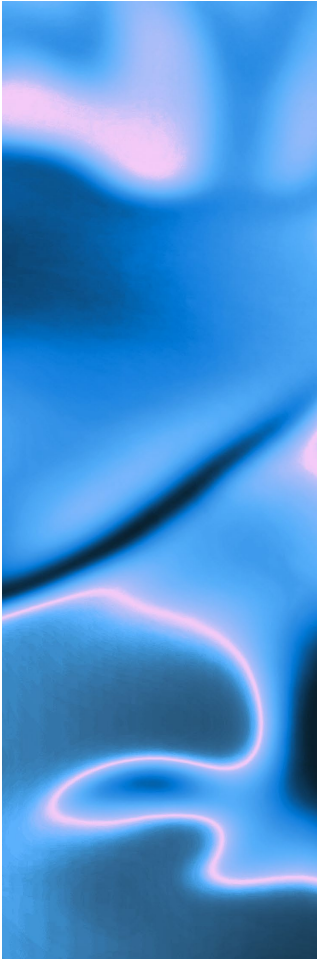

Microsoft Purview Suite

- \$7 savings (~36% per license)
- Enable end-to-end data security + compliance
- Prepare for GenAI + regulatory requirements

Value proposition

Data Security for the AI Era

Office 365 E3 + EMS E3

Or

Microsoft 365 E3

Data Security + Compliance

Built for organizations with low data risk and regulatory requirements and unlikely to activate GenAI apps

- Manual data classification and labeling with **Information Protection**
- **Data Loss Prevention** for emails and files stored in SharePoint Online and OneDrive for Business.
- Org wide retention policies for coarse grained **data lifecycle management**
- Basic **Audit and eDiscovery** workflows for simple investigations

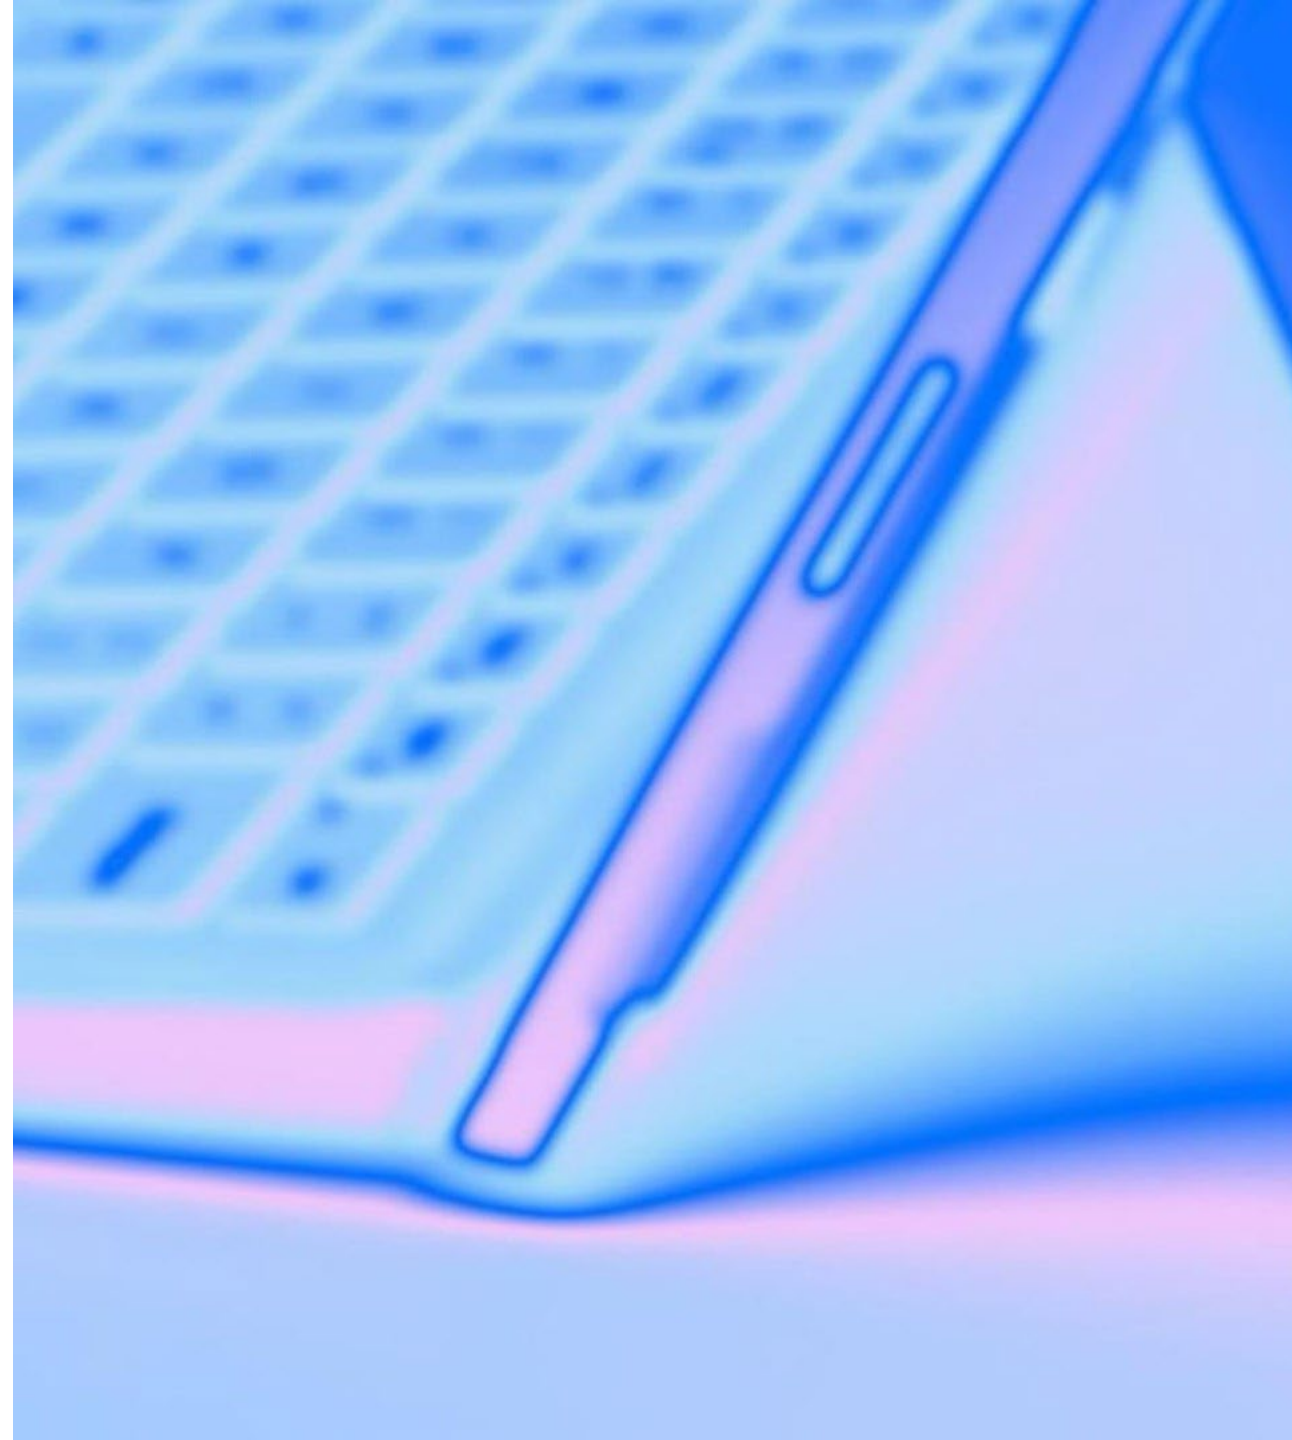

Microsoft Purview Suite

Data Security + Compliance

Built for organizations subject to higher data risk and regulatory requirements and activating GenAI apps

- Automatically discover, classify and label sensitive data, and prevent its unauthorized use across apps, services, and devices with **integrated Information Protection and DLP**.
- Understand user intent around use of sensitive data and defend against insider risks with **Insider Risk Management and Adaptive Protection to automatically adapt policies based on risk level**.
- **Protect Microsoft 365 Copilot** data from accidental oversharing, data leaks, or non-compliance usage.
- Drive adherence to common industry and regional regs (eg EU AI Act, ISO, etc) with **pre-built templates in Compliance Manager**.
- Streamline your response to events and investigations with Audit retention policies and **Audit insights and drive investigation efficiencies with eDiscovery workflows and analytics**.

Advanced security for small businesses

Advanced Security for Business Premium

Business Premium + Defender Suite + Purview Suite

Microsoft 365 Business Premium

Productivity and Security Suite

- Entra ID P1: **Conditional Access** based on predefined conditions like device compliance, location, and app sensitivity
- MDO P1: Email and collaboration security, including **anti-phishing, anti-malware**, and **safe links/attachments**.
- MDB: AI-powered, SMB optimized **endpoint security with EDR and automatic attack disruption**. Across Windows, macOS, Linux, Android, and iOS.
- Purview Information Protection: **Encrypt emails** and discover, classify, and manually label sensitive data.
- Intune P1: Manage **devices and work data** on company-owned and employee devices. Remove business data from lost or stolen devices

Microsoft Defender Suite

Enterprise-Grade Security Solution

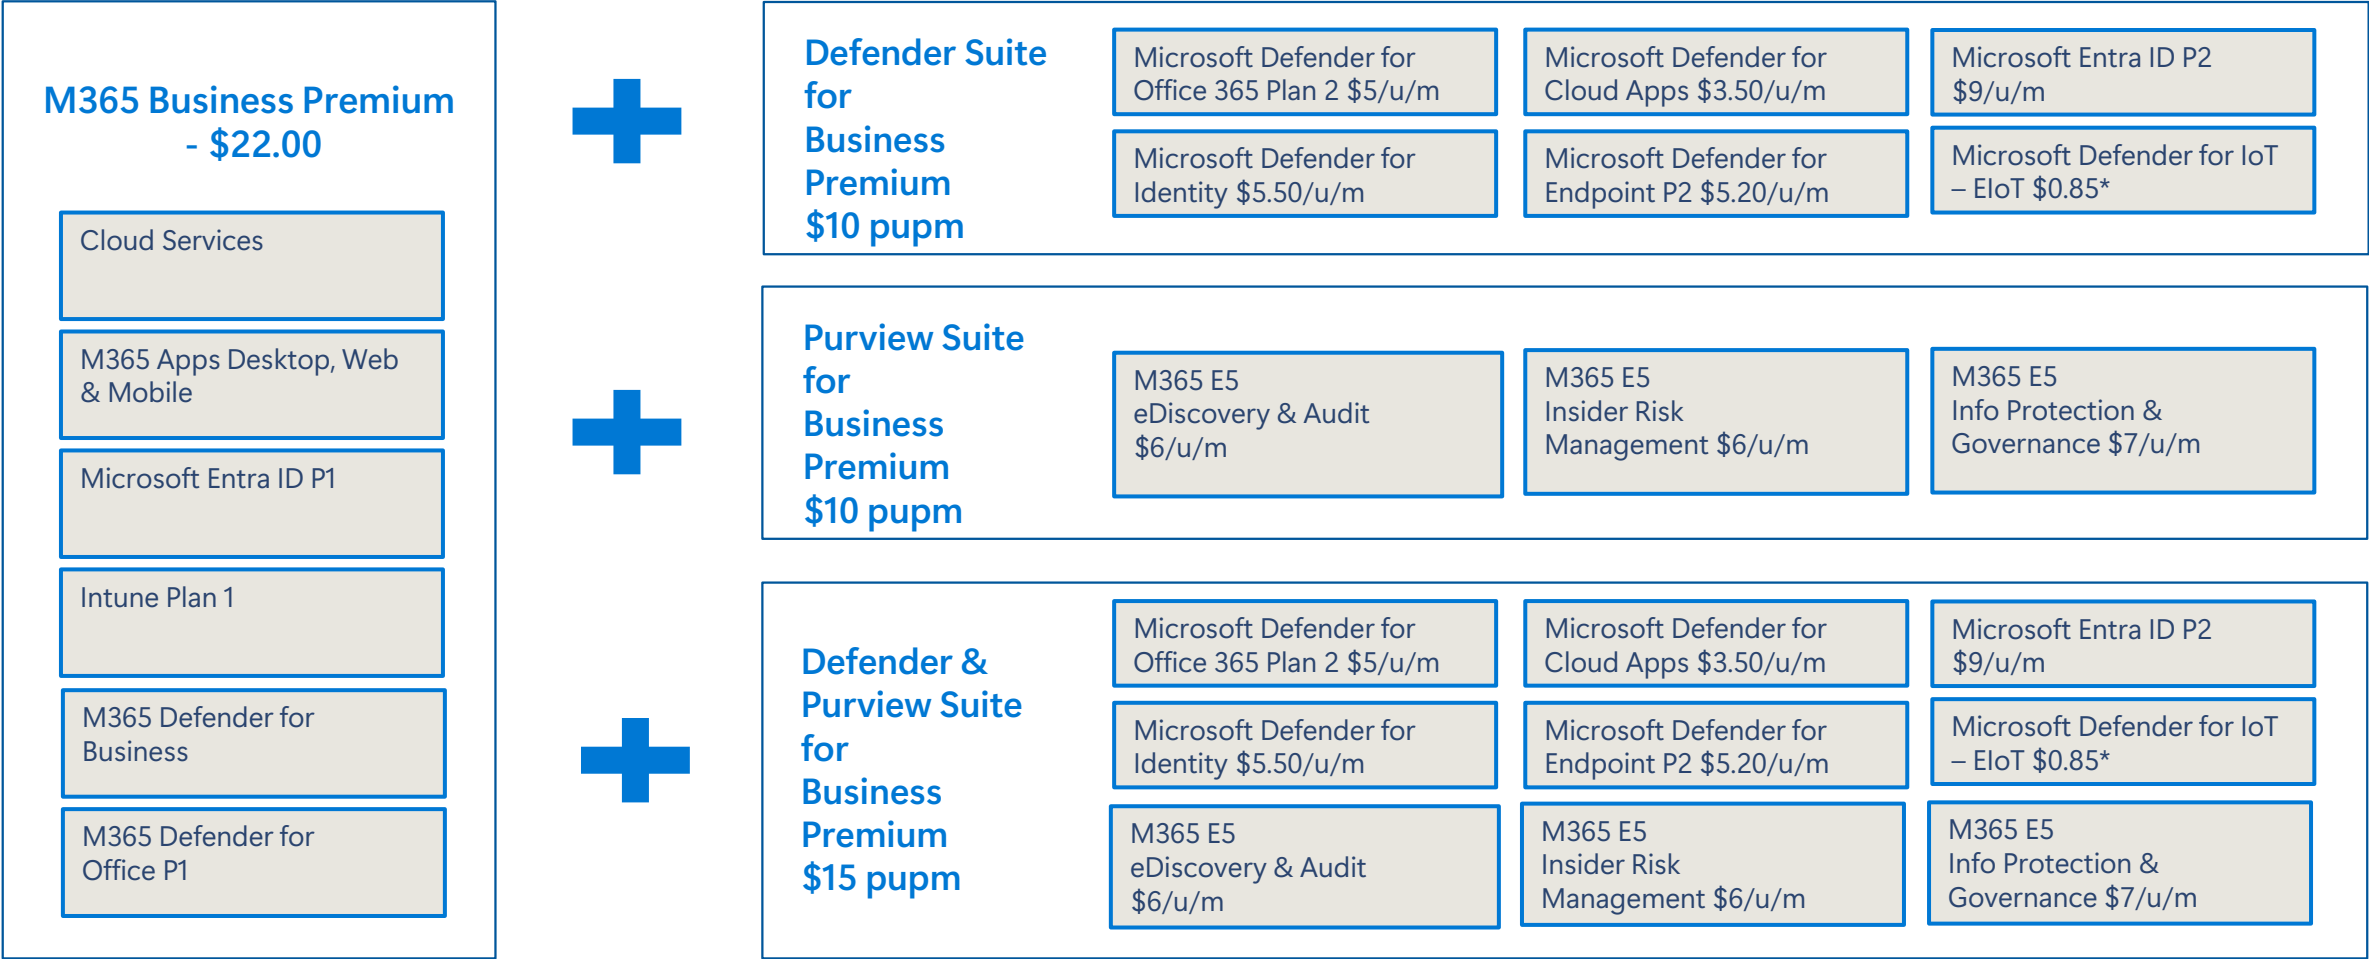

- Entra ID P2: **Risk-based conditional access, ID Governance Privileged Identity Management**
- Defender for Identity: **cloud-based identity security solution**
- MDO P2: **automated investigation and response, end user phishing simulation trainings**
- MDE P2: **Endpoint security and EDR with advanced threat hunting**.
- Defender for Cloud Apps: **SaaS security solution to automatically discover and block apps**.

Microsoft Purview Suite

Simplified compliance and data governance

- eDiscovery & Audit: **streamline investigations, enforce legal holds, and maintain regulatory readiness**.
- Insider Risk Management: **privacy-respecting behavioral analytics and granular communication controls**.
- Information Protection & Governance: **classify, protect, and manage sensitive data across its lifecycle**.

Microsoft Security: Recap

Why Choose Microsoft Defender and Purview Suites?

All-in-one protection

Protect your business against cyber threats while securing and governing your data

Maximize savings

Cut security and compliance spend by up to 68% compared to standalone licenses

Industry recognized

Recognized as a leading security vendor for businesses by independent industry experts

What this means for Microsoft partners

Small and medium enterprise needs and challenges

High-risk, high-need customers facing ransomware, credential theft, and compliance pressure

Existing customers already invested in Microsoft 365 but lacking advanced threat protection and governance

Limited IT resources and growing complexity across devices, identities, and clouds

Increased AI-driven threats and new data regulations raising compliance urgency

Fragmented solutions driving cost and management overhead

Partner opportunity and value

Expand protection and compliance with Defender and Purview Suites—enterprise-grade capabilities built for SME simplicity

Upsell and bundle new SKUs—Defender Suite for Purview Suite add-ons to strengthen their posture

Deliver managed services for security, compliance, and AI governance through Microsoft 365's integrated admin tools

Position proactive solutions—secure and govern AI activity before incidents occur

Simplify and consolidate with Microsoft's unified security and compliance ecosystem

Enhancing outcomes for security challenges

	Defender Suite	Purview Suite
Identity Protection Real-time risk-based policies, identity threat detection, and governance tools, critical for Zero Trust and compliance.	✓	
Email Protection Automatically removes the malicious email from all inboxes, investigates related threats, and blocks similar attacks without waiting for IT to act.	✓	
Endpoint Protection Proactive threat hunting, advanced automation, and expert-driven investigations ¹ Automated protections to keep sensitive data from leaving protected devices ²	✓ ¹	✓ ²
Cloud Apps Security Gives full visibility, risk scoring, and the ability to block or control risky apps in real time.	✓	
Data Security & Compliance Automated classification, insider risk detection, advanced auditing, and legal compliance tools, critical for regulated industries or sensitive data.		✓

Demand generation tools

Why demand generation matters

- Builds awareness and interest before the sales conversation begins
- Accelerates customer decision-making with targeted education
- Supports partner differentiation in a crowded marketplace
- Positions your brand as a trusted Microsoft security advisor

Microsoft has pre-built turnkey resources and activities for partners to integrate into existing or new demand generation efforts

Campaign in a Box (CiaB)

Drive top of funnel leads to go-to-market quicker and faster

- Ready to launch customizable campaigns
- Approved Microsoft value propositions, messaging and branding
- Aligned to Microsoft priority solution areas and industries
- Available **free** to all Microsoft AI Cloud Partners
- Microsoft invests significant \$\$ and resources so that partners can go to market faster
- Drive top of the funnel leads for partners

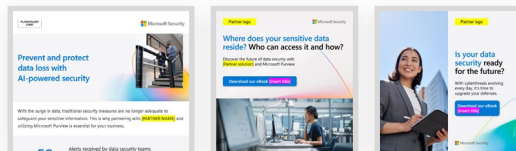

Partner Marketing Center (PMC) –Downloadable customizable assets w/ execution guides

[https:// aka.ms/partnermarketingcampaigns](https://aka.ms/partnermarketingcampaigns)

Example: partner marketing center campaign | Data security

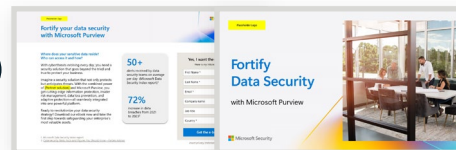

Build awareness

Demand gen email sequence, social assets/ads, Infographic, Thought Leadership

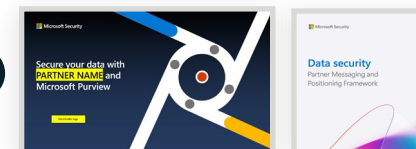

Acquire leads

E-book: Fortify Data Security with Microsoft Purview

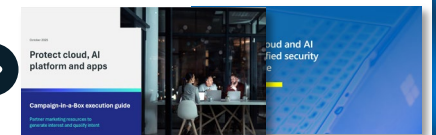

Nurture opportunities

Emails, solution infographics and customer stories

Sales Follow-up

Pitch Decks, Assessments and Demos

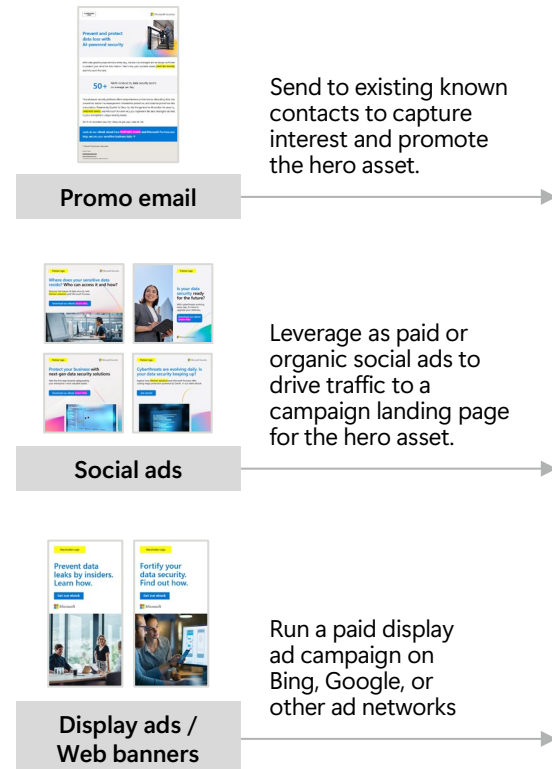

Available to all Microsoft AI Cloud Partners

What is included in the CiaB?

Sequence your campaign with the following marketing touchpoints, using templates in the asset library.

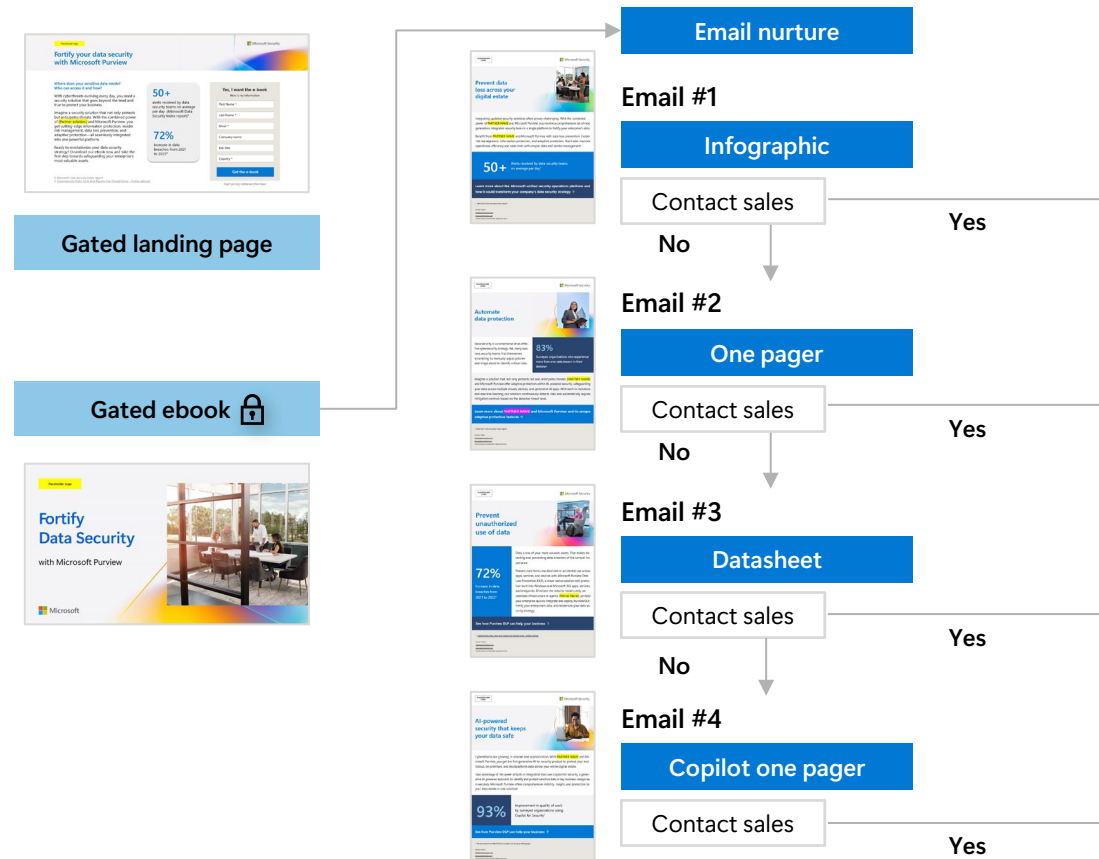

1. Promotion

The hero asset is promoted to target audiences via social and display ads. Promo emails are sent to existing known contacts.

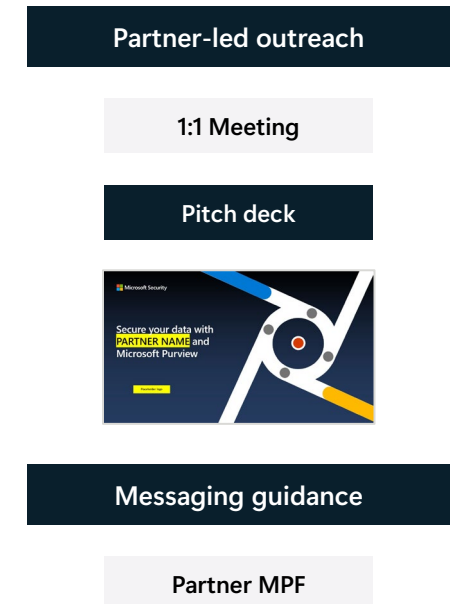

2. Acquisition

Visitors who engage with gated hero asset receive a multi-email nurture series, surfacing mid-funnel assets to enhance consideration. As they progress through nurture campaign and show behavioral indicators, they are qualified for hand-off to sales.

4. Decision

Leads pass to sales following nurture and qualification for a 1:1 meeting. Pitch deck is used to enhance 1:1 customer meetings and encourage next steps.

Security Immersion Briefings

Security Immersion Briefings

Designed to provide Microsoft partners with a demand-generation event engine to drive customer acquisition and growth.

<https://aka.ms/security-immersion-briefings>

A Security Immersion Briefing helps organizations

- Understand the real-world cost and consequences of cybersecurity incidents
- Highlight value of advanced Microsoft Security (Defender and Purview Suites) for small and medium enterprises via hands-on demos and real-world scenarios
- Inspire customer to further explore Microsoft Security and your partner solutions

Immersion Briefing Details

- 90-minute partner-led interactive sessions
- 3 unique immersion briefings
- Up to \$2,000 incentive per briefing.

Partner Eligibility

- Must be a CSP Partner
- Security Partner Designation (including SMB)

Security Immersion Briefings

Threat Protection

Highlights Microsoft Defender capabilities: adaptive protection, insider risk management, and endpoint security can detect and respond to threats faster than standard Microsoft E3 or Business Premium.

Suitable organizations with 100 to 3000 seats with Microsoft 365 Business Premium or ME3/OE3 licenses

Data Security

Showcases how Microsoft Purview helps protect sensitive data and respond quickly to threats. It highlights tools like adaptive protection, insider risk management, and data loss prevention.

Suitable organizations with 100 to 3000 seats with Microsoft 365 Business Premium or ME3/OE3 licenses

Advanced Security for Business Premium

Focuses how the new Microsoft Defender and Microsoft Purview for Business Premium suites strengthen SMB defenses against evolving cyber threats and data loss.

Suitable organizations with 50 to 300 seats with Microsoft 365 Business Premium

Who are the right customers to target?

Commercial organizations with 100 to 3000 seats with Microsoft 365 Business Premium or ME3/OE3 licenses

Briefing personas

Attendees for these immersion briefings should be Security Decision Makers (SDMs).

Business Decision Makers (BDMs)

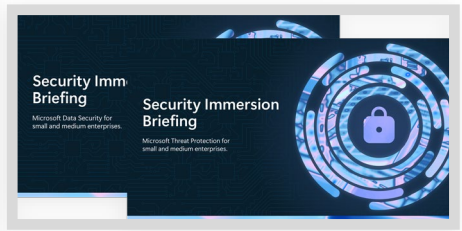

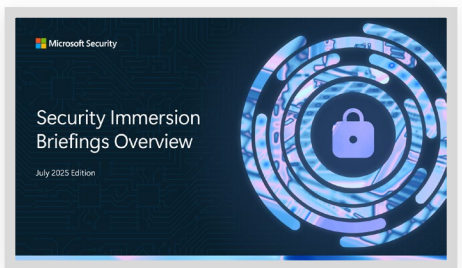

Include Directors, Executive BDMs, Finance BDMs, and CXO BDMs. These roles influence budget and strategic alignment, especially in data protection and compliance

Technical Decision Makers (TDMs)

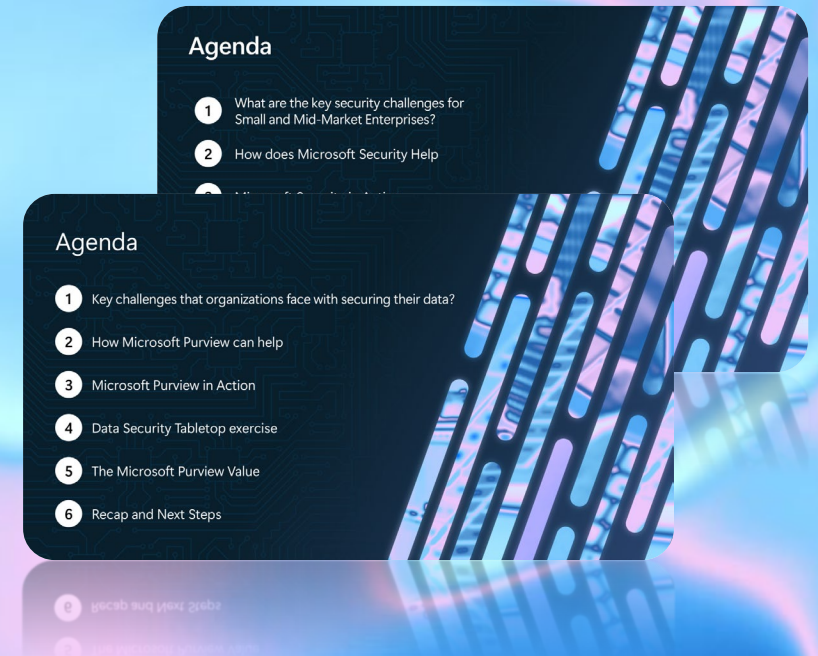

ITDMs/SDMs prioritize technical depth, integration, and operational efficiency. Messaging should emphasize platform unification, threat detection, and compliance automation

The briefing kit

Briefing agenda

- Microsoft Security pitch (30 minutes)
- Interactive demo (10 minutes)
- Tabletop exercise (40 minutes)
- Microsoft Security value and partner offerings (10 minutes)

Microsoft Security pitch

Midmarket—did you know?

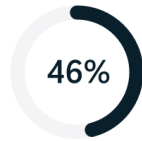

1 in 5
data security incidents happen because of insiders

Data Security Index Report, Microsoft, Oct 2023

Median time for users to fall for **phishing emails** is less than

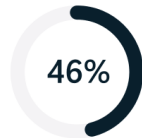

HG Insights SMB Market 2024

of all cyber breaches impact businesses with **fewer than 1,000** employees

HG Insights SMB Market 2024

of medium-sized businesses experienced a **cybercrime** in the past year

HG Insights SMB Market 2024

Organizations have fewer resources to prevent, detect and respond... and **costs related to cybercrime** are expected to reach

Tabletop exercise hands-on

Recap

- **Demand generation** creates awareness, builds trust, and fuels pipeline growth
- **Campaign-in-a-Box** and **Security Immersion Briefings** are turnkey solutions aligned to current Microsoft sales plays that partners can integrate into their own motion.
- **Campaign in a Box:** Ready to launch, marketing assets positioning Microsoft and the partner as a trusted security solution.
- **Security Immersion Briefings:** Engage customers through hands-on experiences that showcase Microsoft Security's value and drive qualified demand.

Pre-sales assets

Customer scenario: Contoso Corporation

Customer profile

Industry: Oil and Gas Markets

Location: United States

Company size:

- 3,000 Office Employees
- 1,000 Frontline Employees

Current technology:

- Microsoft 365 E3
- Microsoft Defender for Office P1
- Microsoft 365 F3
- Using Multiple Clouds (Azure/AWS/Google)

What happened

A competitor / peer company suffered a ransomware attack. The CIO has asked the CISO to make sure that they are prepared and protected.

What was shared by the CSIO

- No real-time visibility to refinery security, all locations are on independent security solutions
- Have looked at non-Microsoft EDR (CrowdStrike) solutions as they believe they are cheaper
- Has a Forcepoint CASB solution deployed

Objective: Build a business case for Microsoft Security

Building the proposal: Pre-sales assets

Using pre-sales assets provided by Microsoft are essential to build credibility, tailor proposals, and accelerate customer buy-in

Establish trust and authority early in the sales conversation

Enable faster proposal creation with reusable, validated content

Provide structured, solution-oriented messaging aligned to customer needs

Align partner and Microsoft teams with consistent messaging

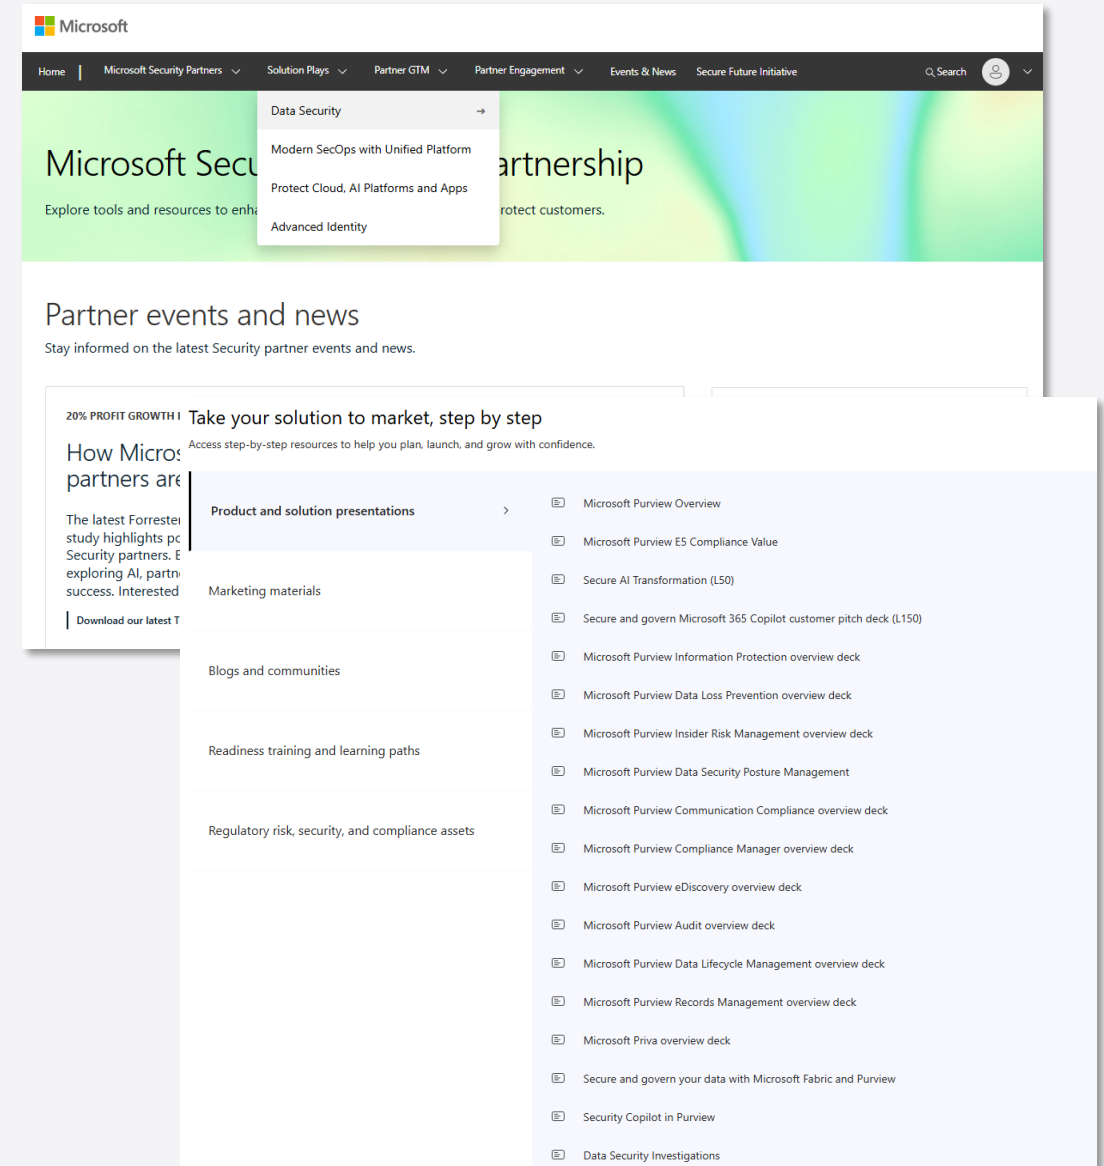

Pre-sales assets: Presentation materials

- Partner ready version of the same materials used by Microsoft sellers
 - Organized by solution play
- **Solution play deck**

Scenario-based approach to solving customer challenges using Microsoft Security solutions.
- **Product pitch ceck**

Showcase specific Microsoft Security products, their features, and value propositions.
- **Microsoft Security value presentations**

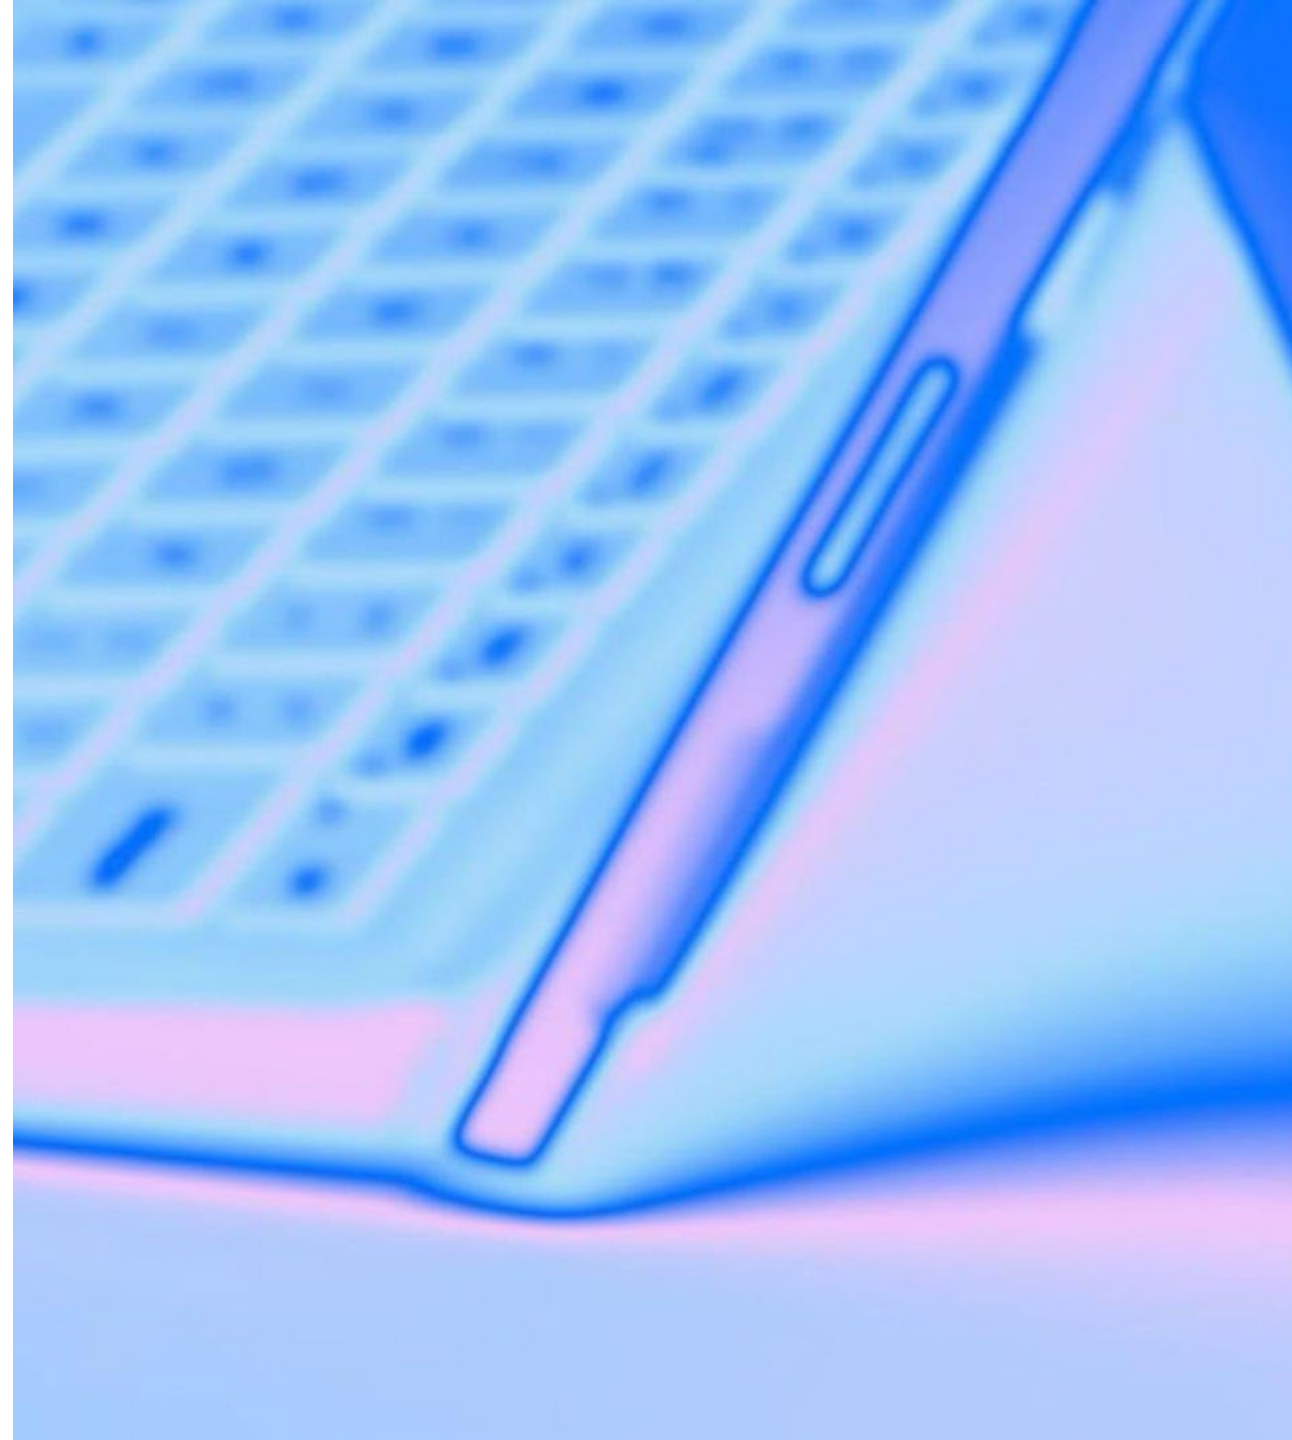

Demonstrate strategic and financial advantages of suite bundles, making it easier to justify upsell opportunities and drive customer commitment

<https://aka.ms/MicrosoftSecurityPartners>

Security Business Case Builder

Clear data-driven business value and return on investment justifications

Help guide partner sellers through business value discussions on Microsoft security products

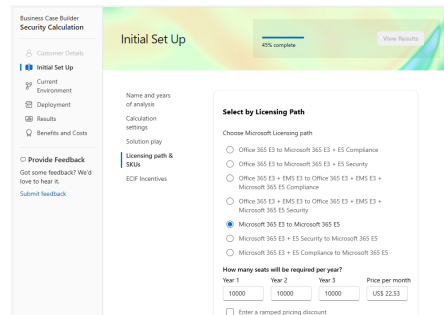

<https://aka.ms/SecurityBCB>

How to use the Security BCB – 4 easy steps and three simple customer conversations

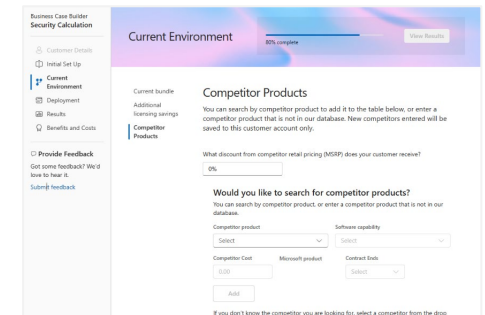

Step 1 – Deal structure What is the customer scenario?

- Enter customer name and information
- Pick your user experience using the solution plays
- Select the licenses that apply to your opportunity
- Mix and match licenses across SCI, Azure, and Copilot
- Pricing pulled from price lists but can be modified by year

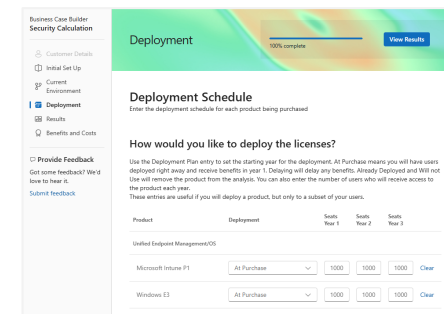

Step 2 – Current environment Can your customer save from vendor consolidation?

- Initial customer conversation
- **Generates hard cost savings**
- Enter current Microsoft information
- Search or dropdown of most common competitors with pricing
- Delay benefits if required

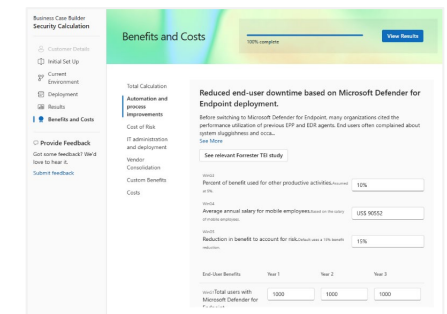

Step 3 – Deployment What products will your customer use and when?

- Second customer conversation
- **The deployment schedule makes the results realistic**
- Enter a deployment schedule for each licensed product
- Vary schedule by year if required

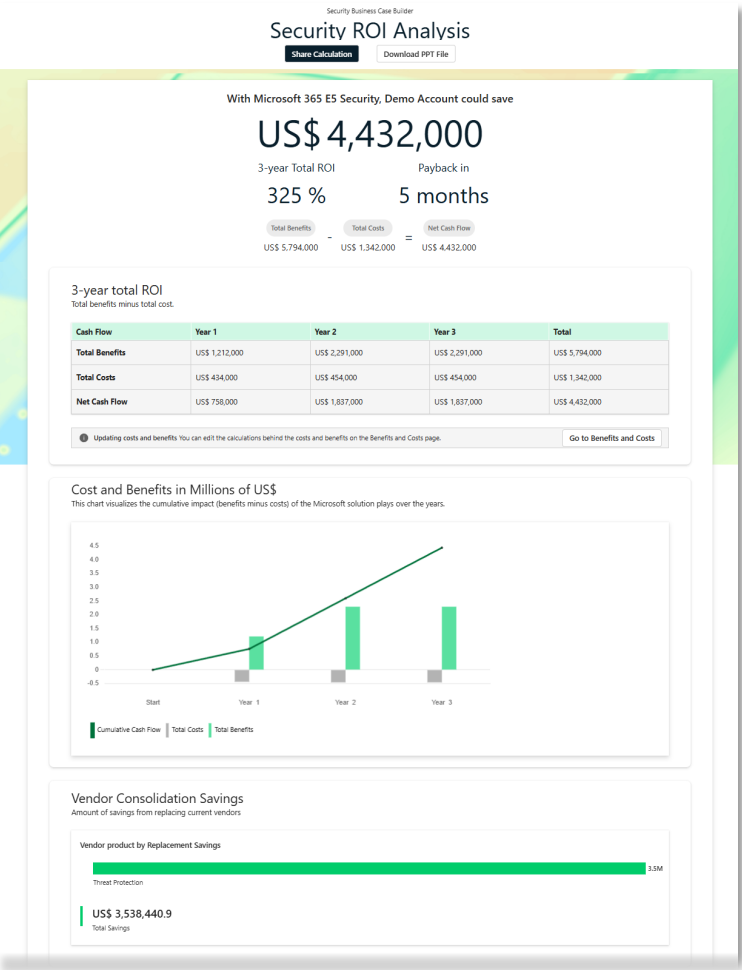

Step 4 – Benefits and costs How much will they spend and what are the business impacts?

- Final customer conversation
- Fine-grained inputs for all calculations
- You can use a partner to help estimate costs if required
- **Review and remove benefits that don't apply before showing to the customer**

Customer ready outputs

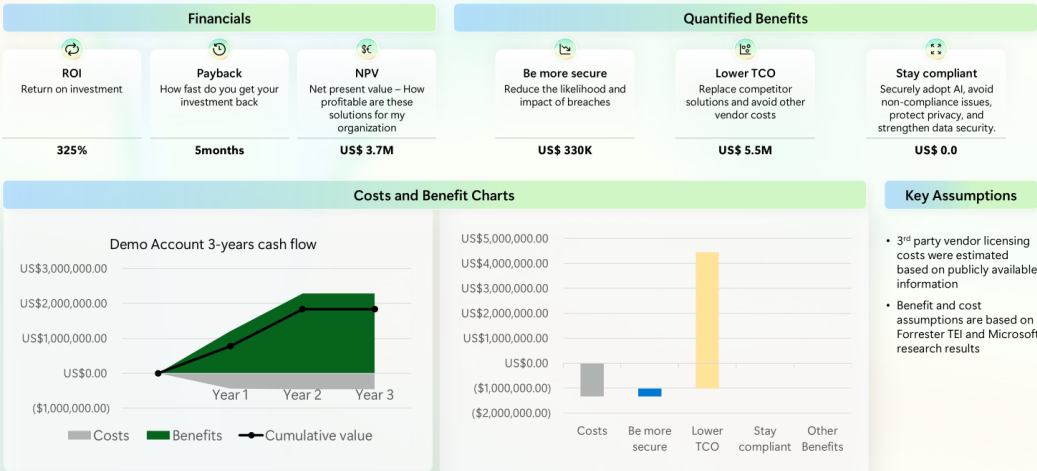

Explanation of Financial Metrics

Metric	Definition	Calculation
Return on Investment (ROI) (Calculated as %)	ROI measures the profit or benefit you receive from an investment compared to what you spent. ROI is calculated by dividing net benefits (IT and Business benefits less Cost) by Cost.	$\left(\frac{\text{IT Benefits} + \text{Business Benefits} - \text{Cost}}{\text{Cost}} \right) \cdot 100$
Payback Period	The Payback Period is the time it takes to recover the initial investment from the profits generated (break even point of an investment). This is the point in time	$\frac{\text{Investment Cost}}{\text{Annual IT Benefits} + \text{Annual Business Benefits}}$

Executive Summary

Demo Account can use Microsoft Security solutions to boost operational efficiency, stay ahead of threats, and empower their team to achieve more. By implementing Microsoft solutions, Demo Account is expected to realize a 3-year ROI of 325%. Competitors being considered for displacement: Forcepoint CASB, CrowdStrike, Other

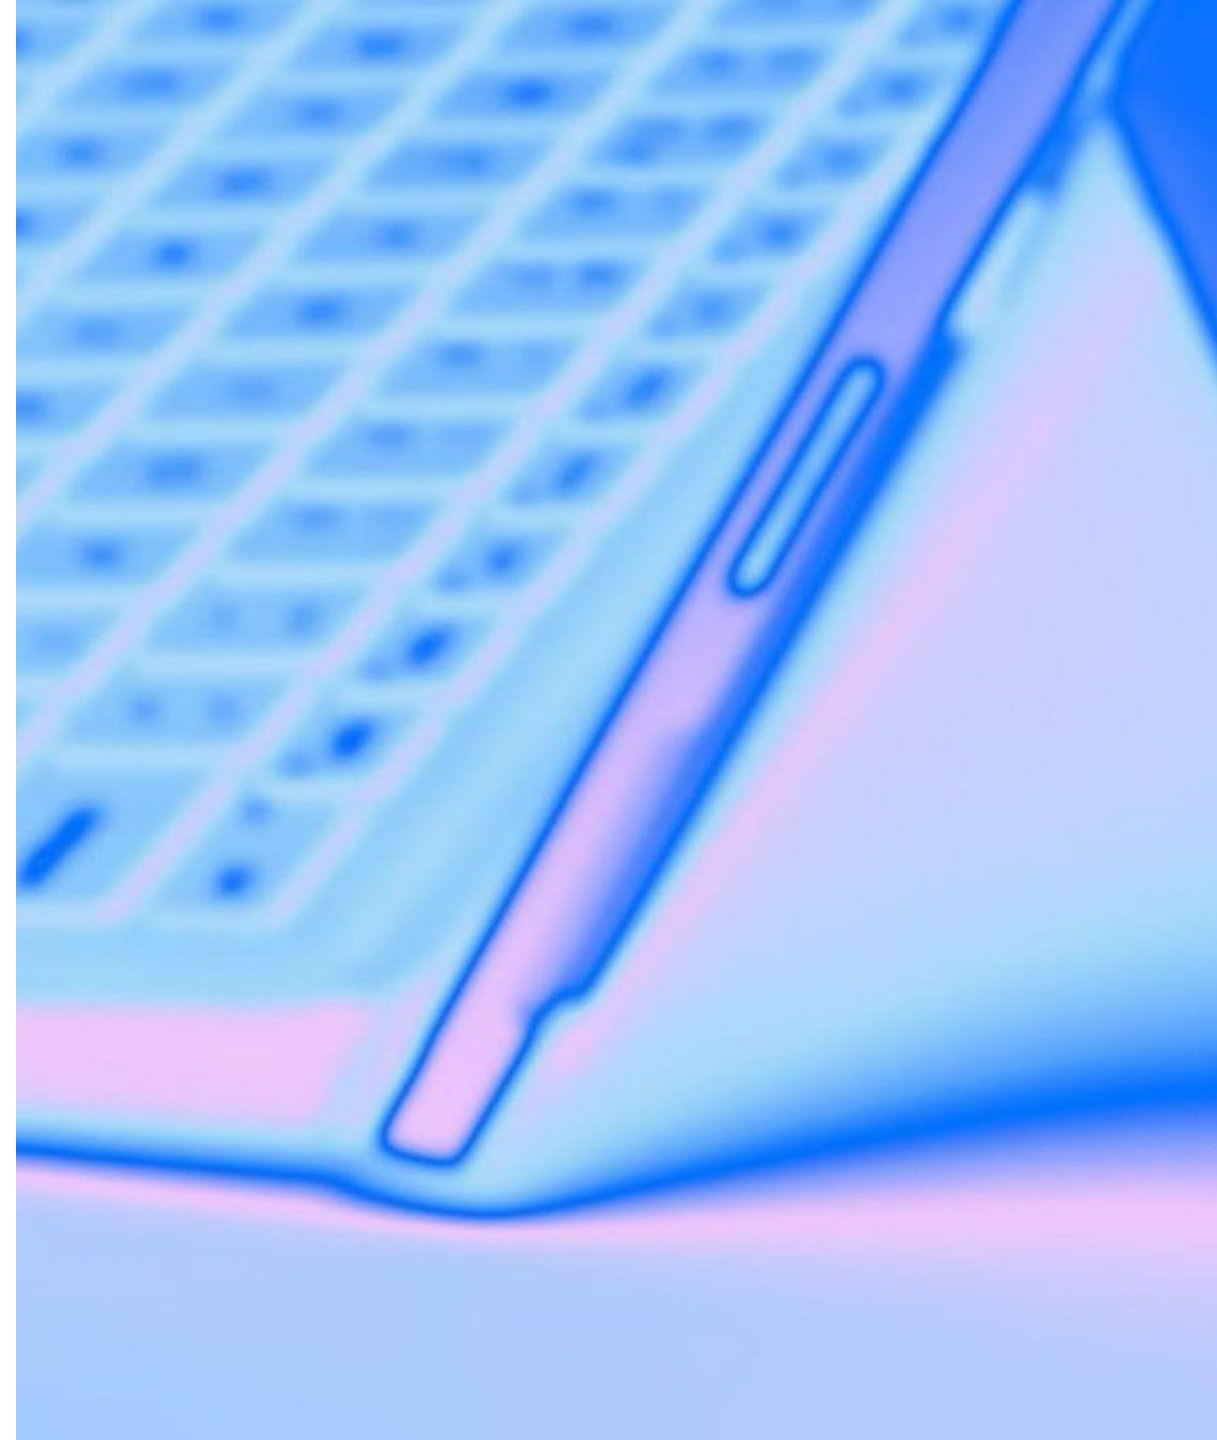

Simplified calculation

$$\sum_{t=1}^N \frac{\text{IT Benefits}_t + \text{Business Benefits}_t}{(1 + \text{Discount Rate})^t}$$

TCO = C_{purchase} + C_{operation} + C_{maintenance} + C_{training} + C_{support} + C_{disposal} (license termination, displacement)

How to use Online Security Business Case Builder

<https://aka.ms/securitybcb>

Customer scenario: Contoso Corporation

Objective: Build a business case for Microsoft Security

Assumptions:

- Contoso can receive a 10% discount for the Microsoft Defender mini-bundle
- Microsoft is co-investing \$20,000 to accelerate the migration work
- Contoso will no longer need Defender for Office 365 P1 saving \$90,000 a year
- Contoso gets on average a 15% discount from other vendors
- CrowdStrike EDR is being offered at \$10 per user per month (\$480,000 per year)
- Contoso currently does not have the ability to take advantage of the capabilities of Entra ID P2
- Forcepoint would not be deployed until the 2nd year due to existing contract

Accessing Security Business Case Builder

> <https://aka.ms/securitybcb>

- Partner credentials required
- Click 'Start Security Business Case' to begin

> **Online and download (Excel) versions available**

- Use the online version (Recommended) to develop customer ready outputs
- Use the offline version if you are looking for total control of the inputs

MICROSOFT SECURITY FOR ENTERPRISE

Security Business Case Builder

The Security Business Case Builder utilizes real customer data from Forrester studies to demonstrate the ROI of Microsoft Security Solutions. Customize your calculations to create a tailored business case that fits your customer's security needs and accelerate their security journey today!

WHAT'S NEW

Check the latest updates

June 2025

- The upgraded Security BCB URL is now available to Partners on Transform Security Business Case Builder.
- MISE compliance updated to the latest version to ensure that Security Business Case Builder application has enhanced security with logging in and prohibits unauthorized access.
- New training videos added on the Learning tab of the tool.
- Improved app stability and reliability with critical bug fixes on calculations.
- Improved customer report executive summary chart.
- Enhanced user experience with reduced loading times.

May 2025

- New customer report aligned with Microsoft Security narrative and outcomes of Be More Secure, Lower TCO and Stay Compliant.
- Updated product benefits and calculations to improve ROI accuracy.
- Updated Microsoft product capabilities with updated competitors and relevant security ROI sources.

Why great solution demos matter

Interactive demos help bring Microsoft Security to life, helping partners engage customers, uncover needs, and accelerate decision-making.

Showcase real-world scenarios that resonate with customer challenges

Differentiates your offering with a tailored, immersive experience

Build confidence in Microsoft Security's capabilities through hands-on experience

Accelerates the sales cycle by making abstract value tangible

Microsoft demo experience (MDX) provides partners with a variety of demo experiences

Microsoft Demo eXperiences

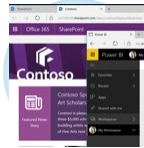

Interactive digital experiences using fully functional Microsoft 365 environments

Help your customers understand:

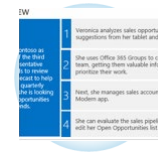

Why

Discover why Microsoft
is the right choice for
their business

What

Understand what needs to be
done to achieve their
business goals

How

Learn how to implement,
manage, integrate and support
Microsoft Cloud products

<https://aka.ms/cdx>

Experience overview

With a variety of difference experiences to tailor to your audience and desired outcome, MDX experiences are organized into two broad categories.

Live experiences

A live product demonstration and presentation using a demo environment

[View all](#)

Individual demo environment

- › Setup steps
- › Presenter demo guide

Simulated experiences

A presentation that simulates a live environment for product demonstration

[View all](#)

Pre-configured 'demo on rails'

- › Hands-on live environment
- › Personalized Storytelling

Interactive guides

Access MDX as a partner

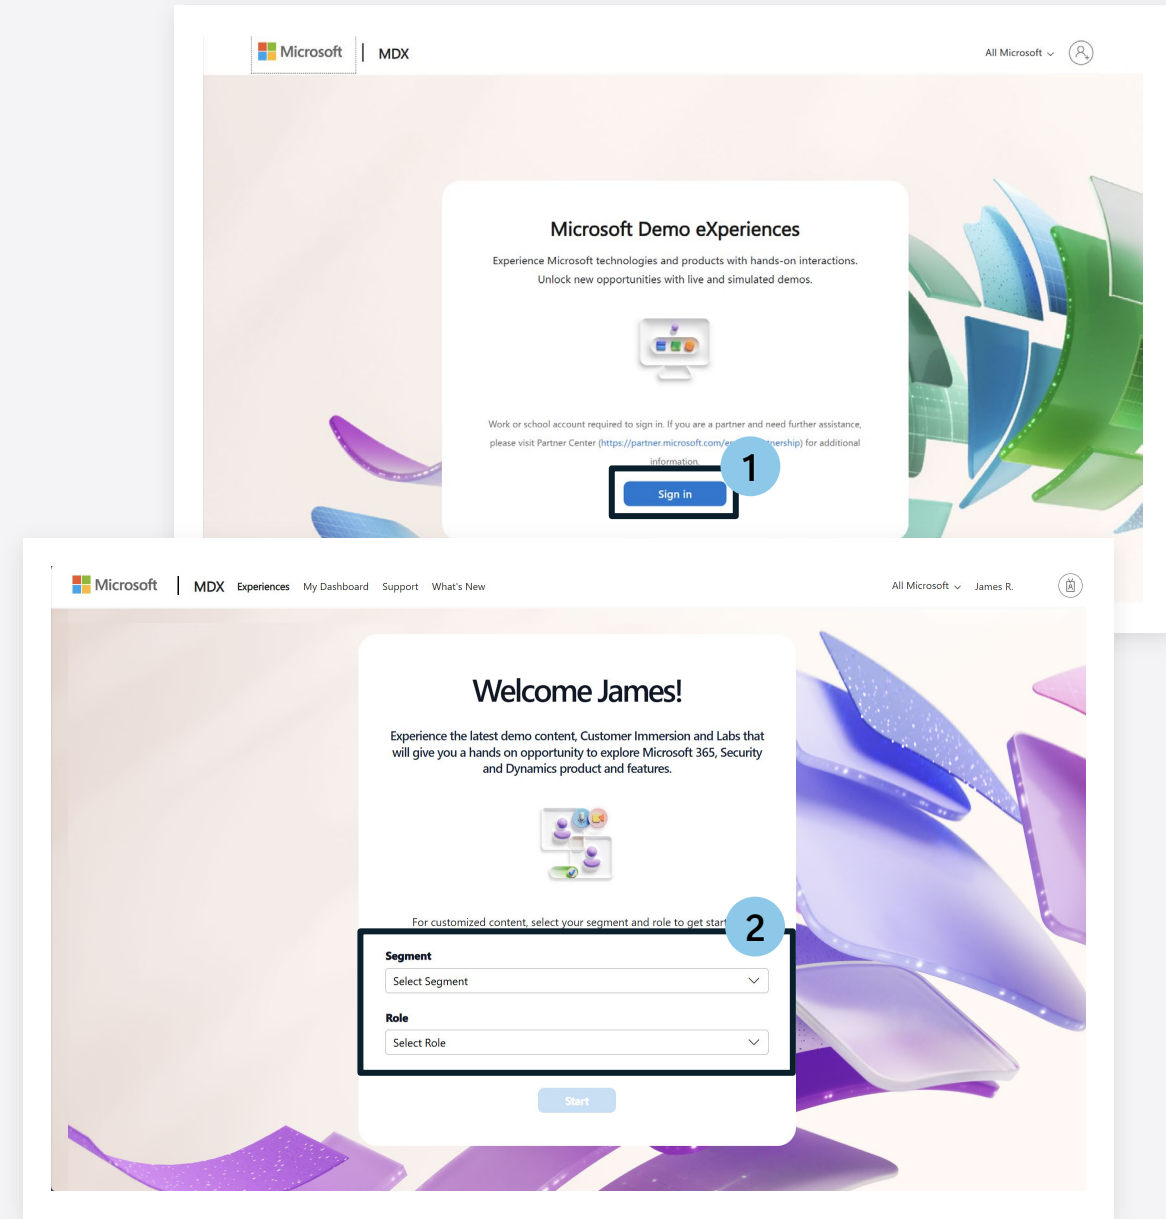

CDX website

cdx.transform.microsoft.com

- 1 Sign-in into MDX using your Organization account you use for Partner Center
- 2 When prompted, select Partner for Segment and Role before clicking "Start".

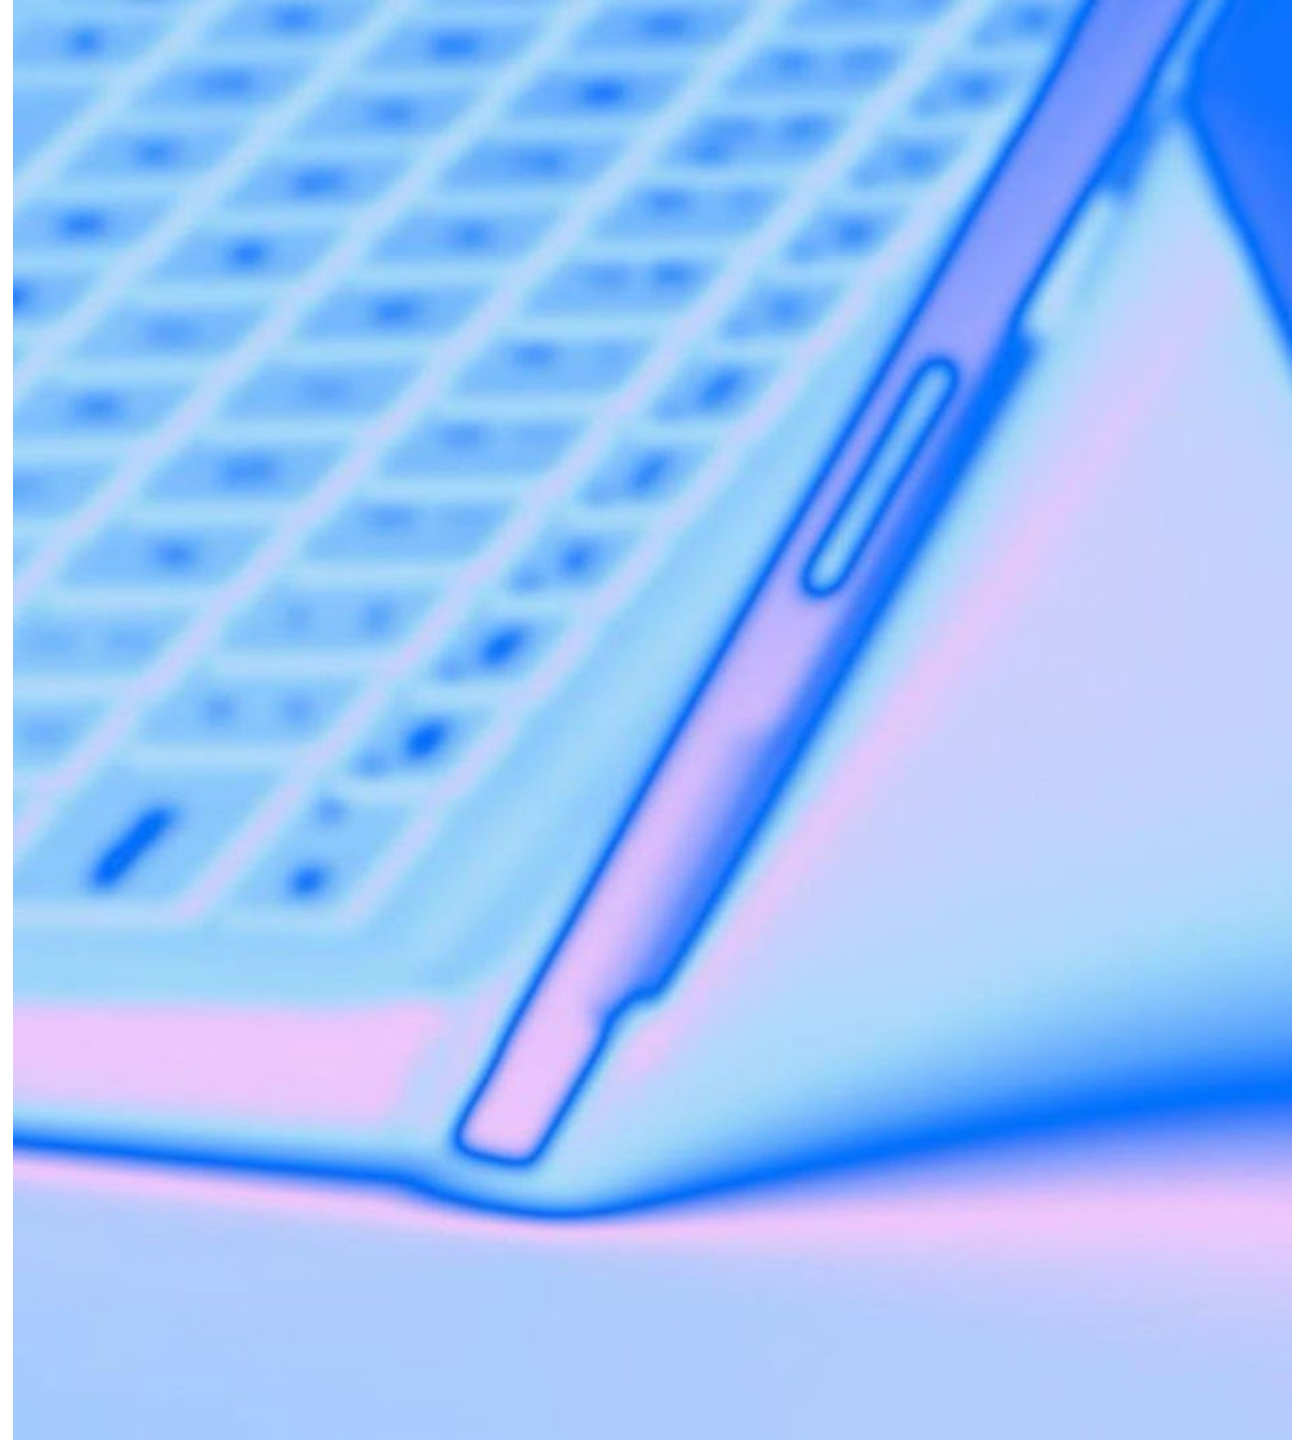

Microsoft Partner Center Help

<https://partner.microsoft.com> and click on Support

MDX Navigation

<https://aka.ms/cdx>

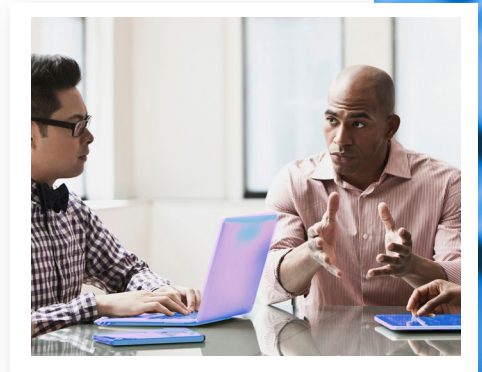

Recap: What to use when

MDX is the platform to get access to preconfigured experiences to highlight Microsoft solutions to your customers.

Interactive demos

Key benefit: Delivers speed and consistency for early-stage conversations

- You need a fast, scalable, and guided experience
- You want to showcase real-world scenarios without setup overhead
- You want to spark interest and discovery

Full tenant demos

Key Benefit: Provides depth and customization for deep technical decision-making

- You need deep technical exploration or custom configurations
- The customer wants to test specific integrations or policies
- You require hands-on validation

Objection handling and compete

Welcome and getting started

- Microsoft Security primer
- Microsoft Security value

Show and inspire

- Demand generation tools

Scenario analysis and solution development

- Pre-sales assets
- Security business case builder

Pitch to proof

- Microsoft demo experiences

Objection analysis and strategy

- Objection handling and compete

Continuing education

- Post sales resources
- Wrap-up and recap

Importance of objection handling

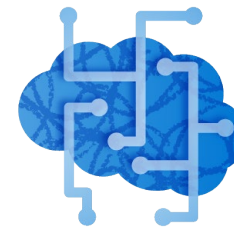

- **Builds trust** by addressing concerns transparently and promptly.
- **Reduces hesitation** with clear, evidence-based answers.
- **Differentiates Microsoft Security** with outcomes, not feature lists.
- **Positions partners as advisors**, not vendors, through consultative guidance

Objection handling best practices

Active listening	Pay close attention to what the customer is saying. Understand their concerns before responding.
Empathy in communication	Show empathy by acknowledging the customer's concerns and validating their feelings. "I understand your hesitation" or "I have heard that concern from other agencies"
Stay calm	Keep a calm and a composed manner. Avoid reacting defensively.
Preparation and experience	Be well-prepared, allowing you to respond confidently to objections. Understand the customer's goals, challenges, and needs to tailor your pitch accordingly.
Positive mindset	View objections as opportunities to build trust and uncover hidden concerns.
Practice, practice, practice	Practice handling objections with colleagues, Role Play, share learnings. This helps refine your skills and build confidence.
Clear and concise responses	Provide guidelines on how to respond to objections clearly and concisely to maintain engagement.

Objection handling best practices

Don't objection handle if you don't have an **actual** objection and/or if you don't know the **root cause**.

Ask clarifying questions

Integrated defense in depth vs point solutions

Microsoft's approach

Microsoft's Platform breadth and defense-in-depth

Understand if a vendor is truly an "END TO END" Security Platform

- Some vendors will claim to offer a 'end to end' security platform, but rely on 3P to fill gaps in their solution
"Do you need integrations to address any gaps in your security setup? Specifically, who is your email security vendor, and who handles your IAM?"

Some vendors in the market are focused on an integration-based strategy for a complete platform approach

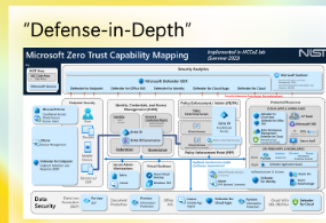

- This approach creates "2 different teams trying to back each other up"
- This multi-vendor approach means there are often multiple, duplicative tools and policies that need to be managed separately

Microsoft has a "Defense in Depth" approach to security

- What is defense in depth? Compensating mitigating controls – when something fails, other tools compensate with complementary controls and work in union to slow or stop attacker
- Best of breed still provides mitigating controls but not coordinated with actions. If something happens on endpoint need 3 or more tools to resolve
- These tools need to correlate signals across tools

Highlight to customers the native integration offered by Microsoft as a differentiation point, customer with E5 licenses have these capabilities already. Remind customers of the increased value as more workloads are protected using Microsoft Defender.

Microsoft and partner confidential

Industry validated

Consolidation can reduce costs and risk of threats

Forrester Consulting
The Total Economic Impact™ of Microsoft SIEM and XDR

Study findings:

Vendor license cost consolidation	\$1.6M saved annually from vendor consolidation ¹
Improvements to threat investigation and response	65% reduction in the time needed to investigate threats and reducing time to respond to threats by 88% ¹
Reduced the chance of a breach	Reduce the risk of a material breach by 60% ¹
Ease of onboarding new employees	91% reduction in the time taken to onboard new security professionals ¹
Faster workbook creation	Reduced the time needed to create new workbooks by 90% ¹

*Results require the full deployment of Microsoft Sentinel and Microsoft Defender XDR
1. Forrester Consulting, "The Total Economic Impact™ of Microsoft SIEM and XDR," August 2022, commissioned by Microsoft

Microsoft and partner confidential

“

Before, I was a best-of-breed kind of person, but that just ended up introducing a lack of integration and visibility that created a lot of work for us.”

Manager of Cybersecurity and IT Infrastructure, Professional Services

“

Having multiple security tools from same vendor has helped us to save detection and response time. We no longer have to go into a bunch of different screens and tools to conduct investigations and respond to threat. The integration is seamless.”

Head of Cyber and Technology Procurement, Logistics

Customer objections

Customer profiles

Prepare to Handle Objections

Combat top customer objections about our solutions

There are 3 major types of customers who are going to give you a hard time/raise objections about Microsoft Security Tools

1

"I only use 'best of breed' tools"

Microsoft is the only security vendor to be **recognized as a leader across 19 categories** by **Gartner, Forrester** and **IDC**.

These best of breed tools are integrated so you get best of both worlds. An integrated platform based on best of breed tools.

2

"What about this [edge case scenario]"

Providing agile, fast support is critical in this scenario. Simply stating "I don't know, but will take as an action item" is more effective than speculating. If you're unsure about something, take it as an action item and connect with other experts and Microsoft team to find out.

3

"I hate MSFT, only talking to you because my CIO/CISO said I had to"

When encountering the sentiment, "We're getting an E5 and have these tools as part of that, but I don't want to give up my favorite tool," recognize that they absolutely LOVE their current tools. Understand that in certain scenarios no amount of persuasion may change this. Instead, focus on demonstrating how we work and succeed with the tools available.

Vetted responses

Prepare to Handle Objections

Combat top customer objections about our solutions

What are common attacks to be on the lookout for?

Our Platform effectiveness *Microsoft Security is only good for Microsoft Based Technologies.*

- Of course, we're good at protecting Windows and Azure since we built them, and we're integrating security capabilities into the platforms.
- From a coverage perspective we provide security capabilities for Linux, MacOS, iOS, Android, Windows and all major public clouds — AWS, Google's GCP, and Azure, of course. Our public customer evidence database and market positioning provide multiple testimonies that we deliver our promise to provide multi-cloud, multi-platform security capabilities

Targeting our XDR Capabilities *Signature-based AV; MSFT don't have USB control capabilities or complex policies; MDE does not have malware search functionality.*

- Competitors may attempt to pinpoint niche or specific features to spread misinformation or land outdated statements. We have addressed many gaps by investing in our platform and product innovations. It is crucial to present the truth about our products and demonstrate their technical value. Understand our true technical capabilities to land our product truth.

Driving Perception *"Microsoft is not a true security vendor" Don't put all your 'eggs in the one basket'; "Microsoft is 'just good enough'—that's not a risk I want to take."*

- Microsoft provides end-to-end solutions that integrate more than 50 categories and is the only security vendor to be recognized as a leader across 19 categories by Gartner, Forrester and IDC.
- Our public customer evidence database and market positioning provide multiple testimonies that we deliver our promise to provide multi-cloud, multi-platform security capabilities to build a safer world for all.

Total Cost of Ownership *"Microsoft has multiple consoles, portals, Multiple Agents, Higher TCO"*

- Many competitors cannot match our E5 bundle value. We have a Unified SOC platform with a unified experience to manage security solutions in a single portal. Drive efficiencies and simplify investigation and response across your SOC by consolidating tools from multiple vendors into a cost-effective XDR solution.

How to attain a Solutions Partner designation

The partner capability score provides flexibility to demonstrate knowledge, skills, and experience across subcategories of performance, skilling, and customer success

A minimum of **70**
points must be earned,
with points in each
category.

There are **100**
points possible in total
across categories.

Performance

This category is measured
by net customer adds

Skilling

This category verifies
and demonstrates your
dedication to skilling
and training by
intermediate and
advanced certifications

Customer success

This category is
measured by usage
growth and the number
of solution deployments

Admins can sign-in to [Partner Center](#) to see how your organization is progressing towards a Solutions Partner designation.

Continuing education

Welcome to the new Skilling Hub

The new **Skilling Hub** is live — built with partners, for partners. It brings Microsoft Titan, Level Up, SureStep, AI Tour for Partners, and regional events together in one place, with simplified sign-in and smoother navigation to get you where you need to go.

Unified destination for all things skilling

Access comprehensive training resources anytime to accelerate partner onboarding and skill development.

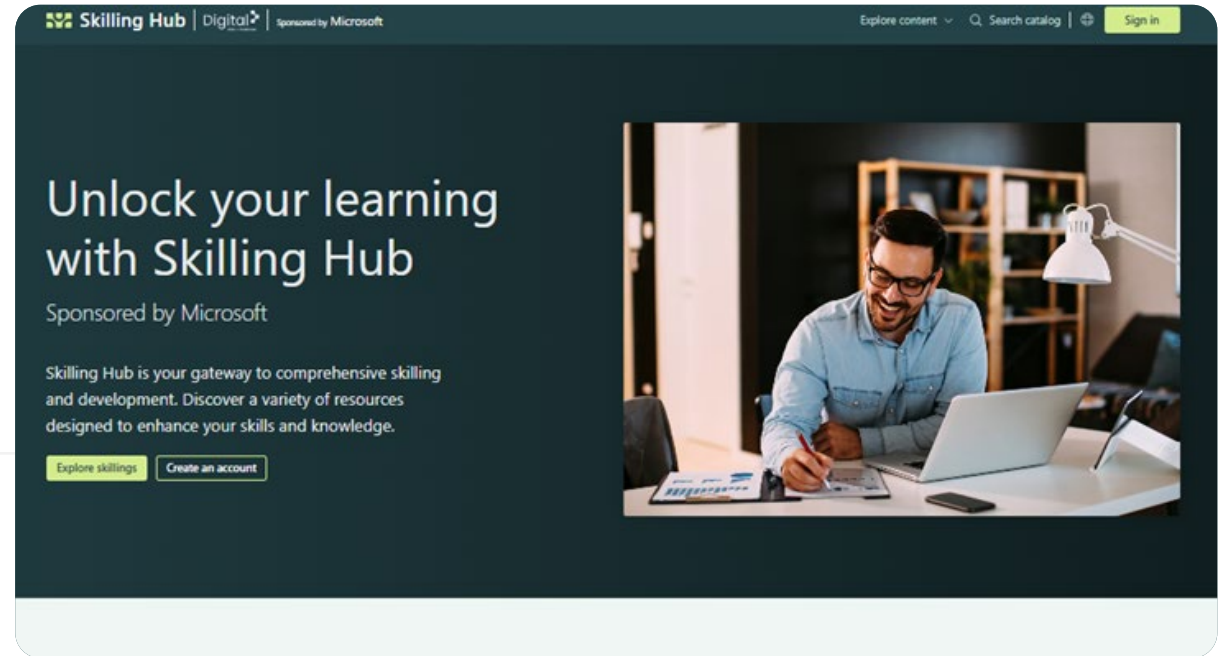

Curated learning paths

Equip teams with the knowledge and tools needed to confidently deliver on real-world projects from day one.

Available in 11 languages

Additional region-specific localization powered by Kudos for live and on demand events

Microsoft Titan Skilling Academy

Microsoft Titan Skilling Academy is a Partner skilling academy consisting of immersive learning framework that empowers our partners to deepen their knowledge and skills across Microsoft solution areas.

Choose your Titan Path by selecting the learning journey that aligns with your role and earn badges across sales and technical workloads to showcase your accomplishments.

How it works

- Learn at your own pace with videos, quizzes, and real-world tasks
- Track progress and advance through structured phases
- Earn badges to showcase expertise and accomplishments
- Boost your LinkedIn profile and unlock new opportunities as a recognized Microsoft Titan

Who will benefit from Titan badges?

- Sales professionals
- Pre-sales specialists
- Technical delivery teams

Register for Microsoft Titan: https://aka.ms/MS_Titan_Skilling_Academy

Microsoft Titan Skilling Academy
